Contents

3	All	Everyone	**Gestures** What tapping, holding, dragging and swiping do across the app.	
4	iPhone	Admin	**Running the schedule** What a scheduling admin sees. Five tabs; everything else is under More.	16 screens
10	iPhone	Member	**A member's app** What someone on the roster sees. Mostly the second demo organisation; the last figures show the other two.	10 screens
14	iPhone	Everyone	**Sheets, system surfaces and sign-in** Things that sit over the app or outside it, the same for an admin and a member.	10 screens
18	iPhone	Design kit	**The parts** The component kit every screen is built from. A development screen; nobody using the app sees it.	2 screens
19	iPad	Admin	**Running the schedule on a wide window** The tab bar floats at the top in both orientations. Lists show their open item beside them.	13 screens
32	iPad	Member	**A member's app on a wide window** What someone on the roster sees on an iPad.	3 screens
35	iPad	Design kit	**The parts** The component kit on a wide window. A development screen.	1 screen
36	Android	Admin	**Running the schedule, in Material** Android gets the system's own tab bar and bar buttons and Material symbols.	5 screens
38	Android	Member	**A member's app, in Material** A live notification stands in for the iPhone's Live Activity.	4 screens
40	Apple Watch	Member	**The shift on the wrist** A native watch app for anyone with shifts. It shows what the phone last sent it and keeps time by itself.	4 screens

What this is

Every screen of the ShiftPilot 2.0 app as it runs today, on the four devices it ships for. One app serves radiology groups and hospital departments; what a person sees depends on their role.

Who sees what

Admin: the people who build and publish the schedule. Member: anyone on the roster. Everyone: the same for both. Design kit: a development screen that is not in the released app.

How it was made

Each picture is a capture from a simulator of the build, placed in a drawn outline of the device. The outlines are illustrations. Every iPad screen is shown twice: in landscape and in portrait. The Dynamic Island cannot be captured from a simulator, so the Live Activity is shown on the Lock Screen.

The data

The organisations, people, hospitals and shifts are the app's built-in demo data. None of it is real.

Every device

Gestures

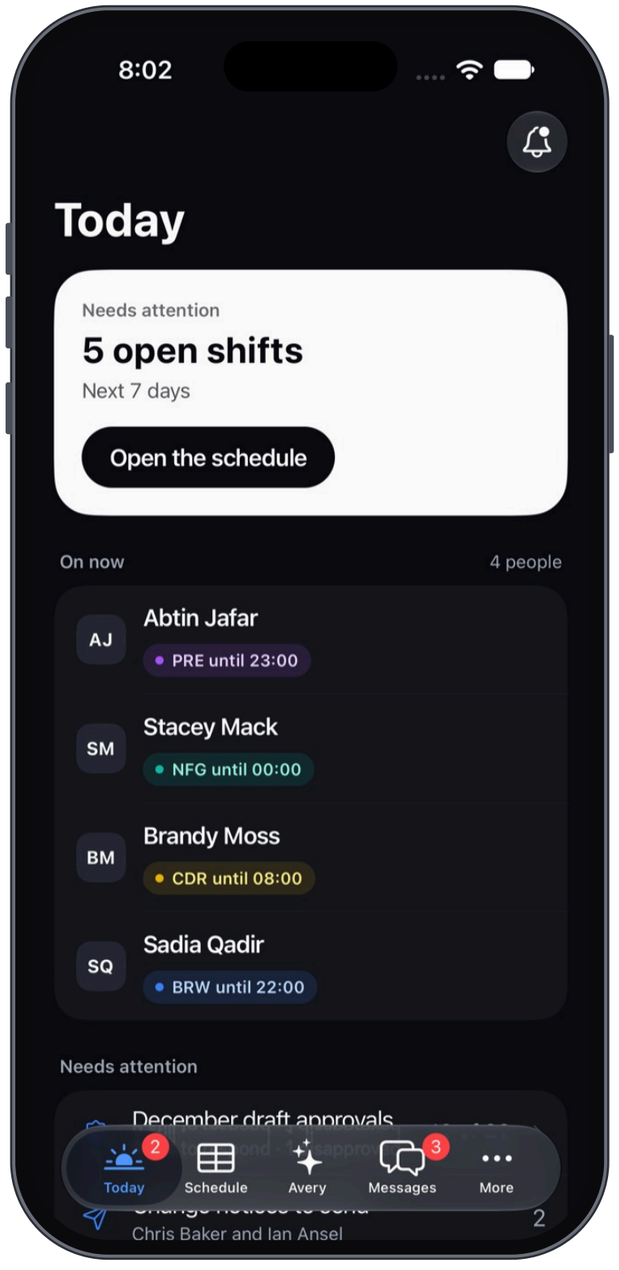

What the app does when you tap, hold, drag and swipe. Holding before a drag is what tells it apart from scrolling, so nothing moves by accident, and each step answers with a light tap you can feel.

Gesture	Where	What it does
Tap	A shift on the schedule board	Opens the shift: who has it, a ranked list of who can cover it, and the actions.
Hold, then drag	A shift on the board	Moves the shift to another day or site. A notice with Undo follows every change.
Hold, then drag	A person in the People panel (iPad)	Drop them on a shift to assign it.
Hold, then drag	A day on the Availability calendar	Marks every day you cross. Starting on a marked day clears the run instead.
Hold, then drag	A day when booking time off	Picks the run from the day you held to the day you reach. Dragging back shortens it.
Swipe left or right	Any month calendar	Goes to the next or the previous month.
Tap	The date headline on Schedule	Opens the whole month; choosing a day closes it.
Pull down	Today, Schedule and the lists	Refreshes what is on screen.
Drag a sheet	Shift detail, publishing, settings	Up for more, down to close it.
Swipe from the left edge	Any pushed screen (iPhone, iPad)	Goes back.
Scroll both ways	The board and the matrices	Days and names stay pinned while the sheet moves under them.
Scroll down	Any tab on iPhone	The tab bar tucks away to give the content room; scroll up to bring it back.
Turn the crown	Apple Watch	Moves from the shift you are on to what is coming up.

iPhone · Admin

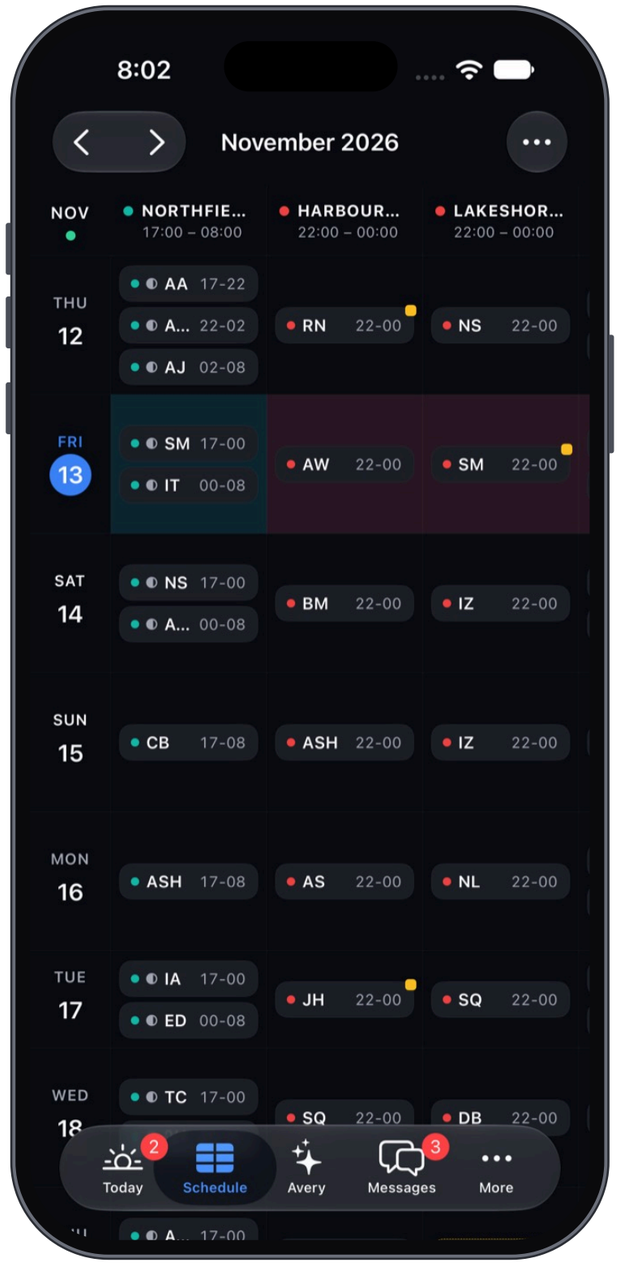

Running the schedule

What a scheduling admin sees. Five tabs; everything else is under More.

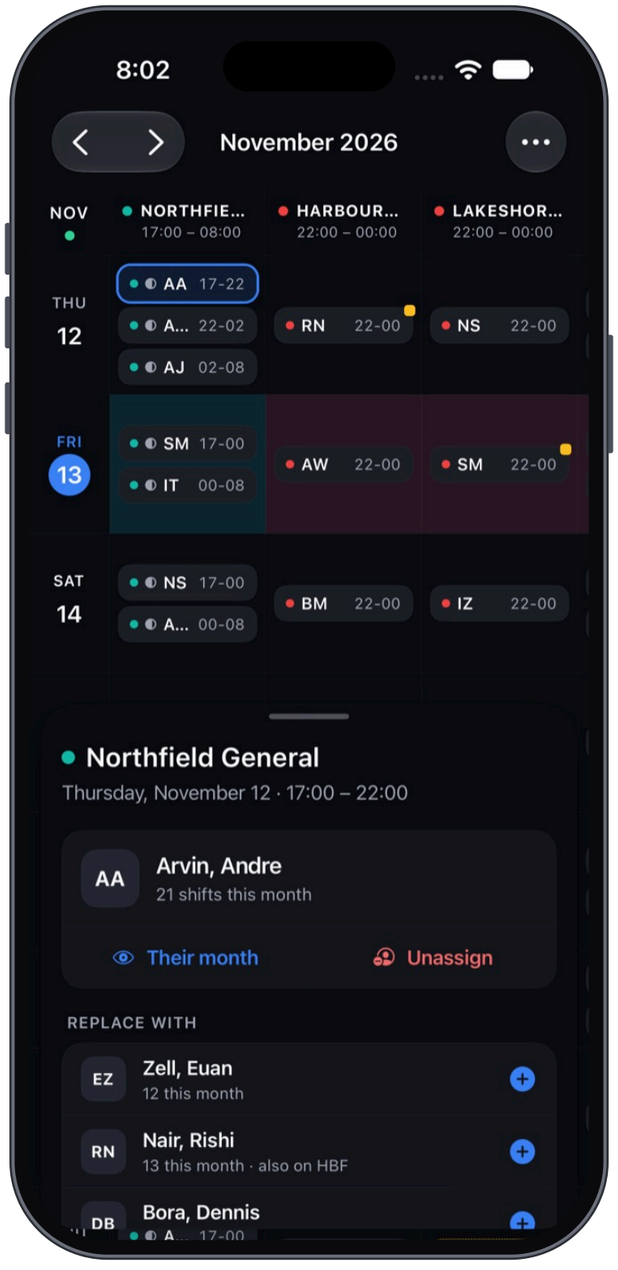

Today

The most pressing item on one card, who is on now, what needs attention, next month.

Schedule: sites by day

The month as a sheet: days down, sites across. Tap a shift, hold and drag to move one.

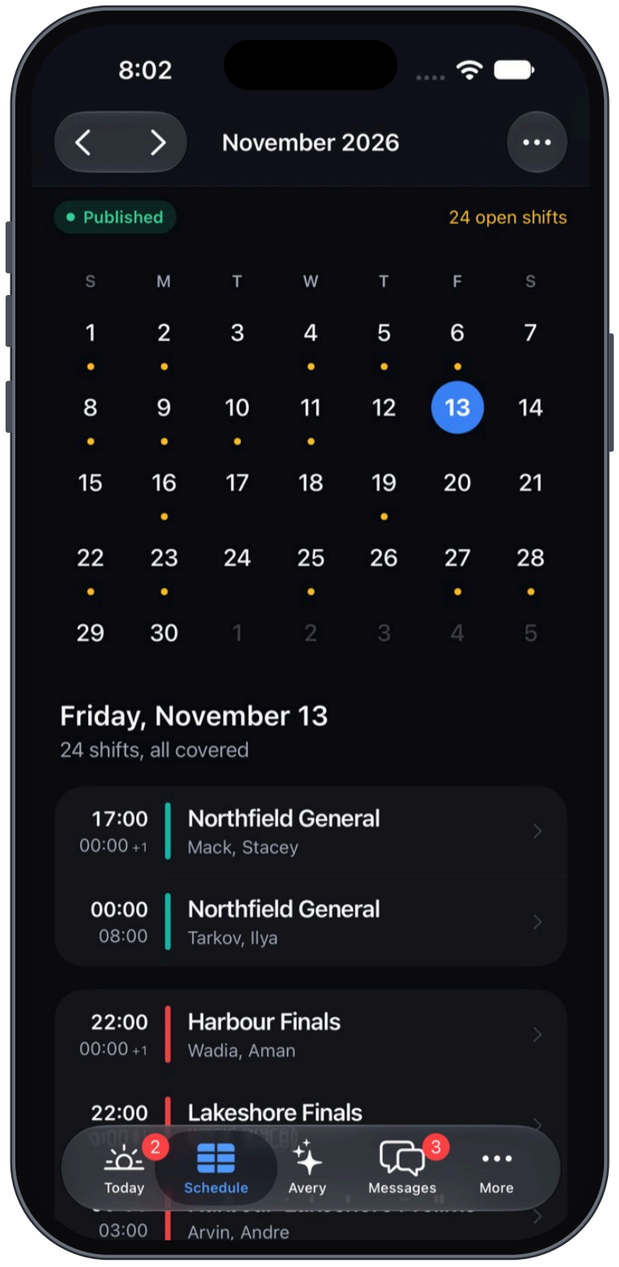

A shift

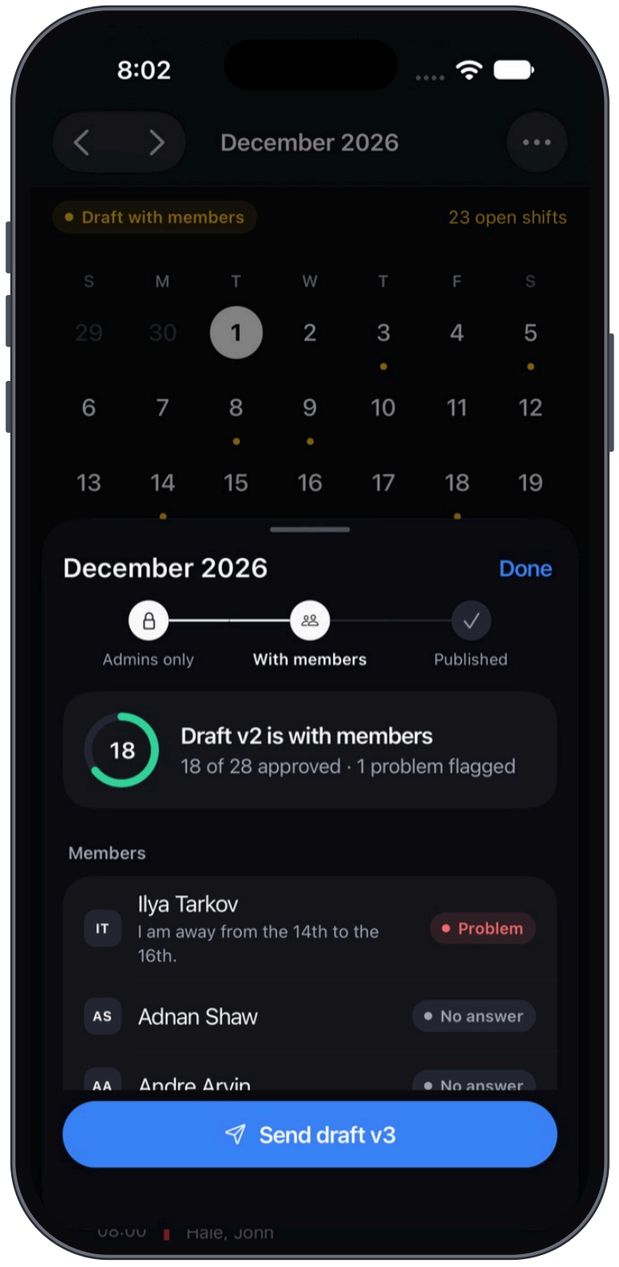

Who has it, who else could take it (ranked), and the actions.

iPhone · Admin

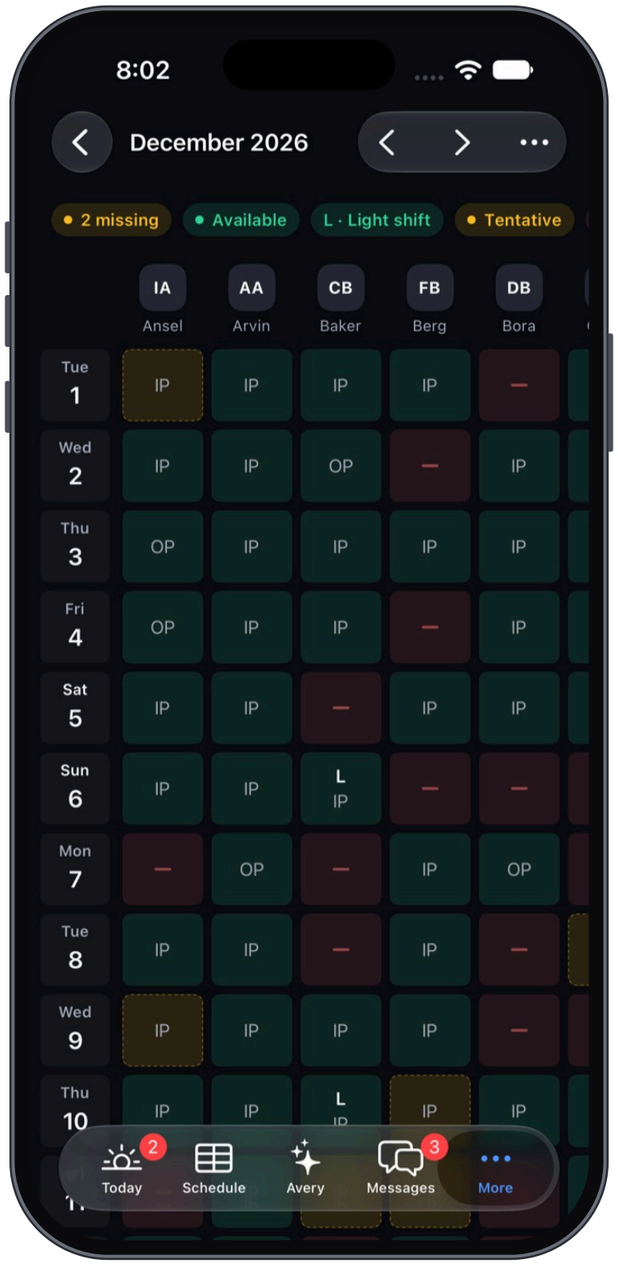

Running the schedule continued, 2 of 6

Schedule: calendar
One night at a time under the month; a dot marks a night with a hole.

Publishing
Send the month to members as a draft, see who approved, remind, publish as final.

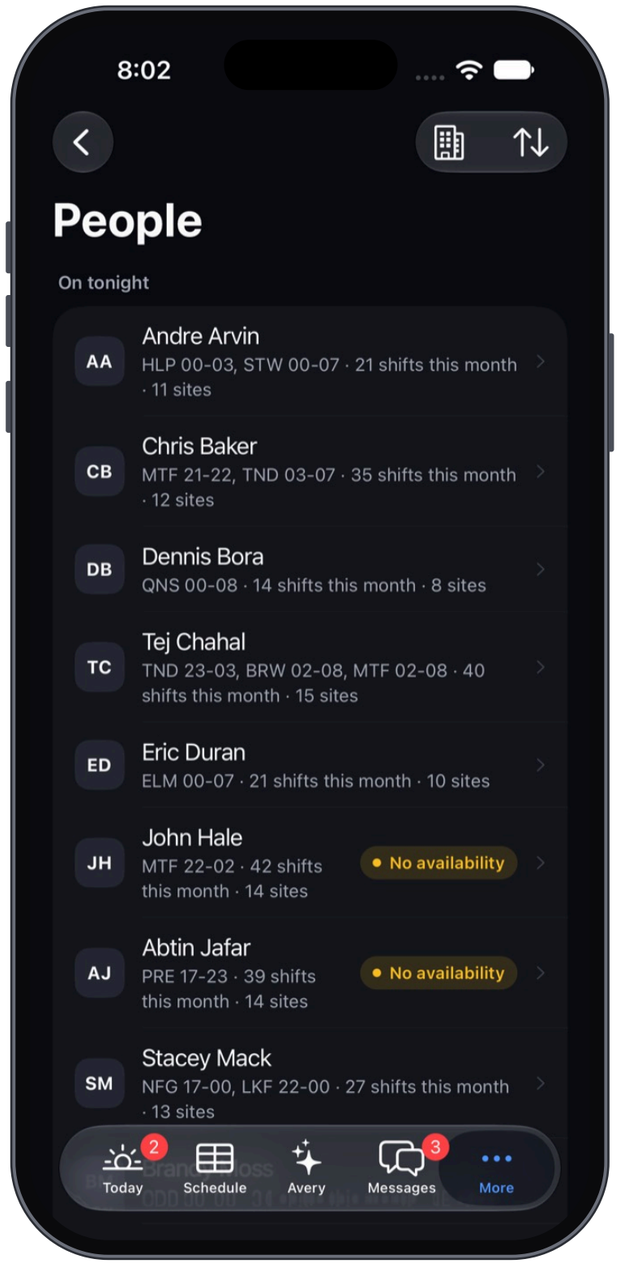

Availability
Who offered which days. A fine dashed outline is tentative, L is a light shift.

iPhone · Admin

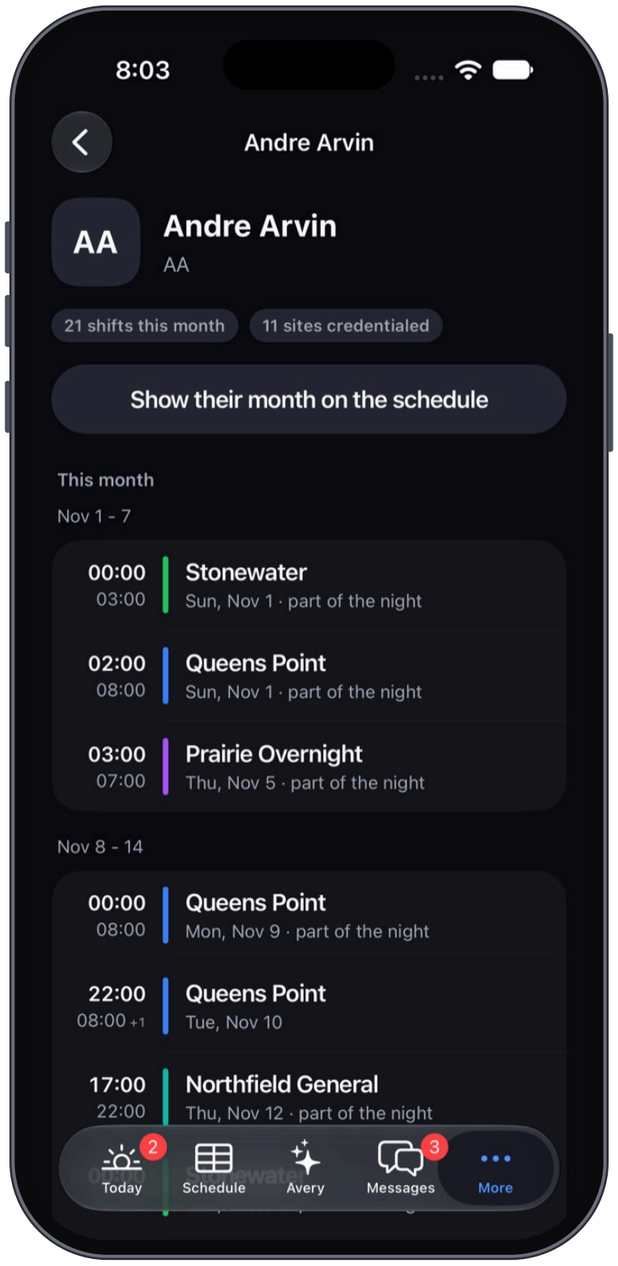

Running the schedule continued, 3 of 6

Credentials
Who can cover which site.

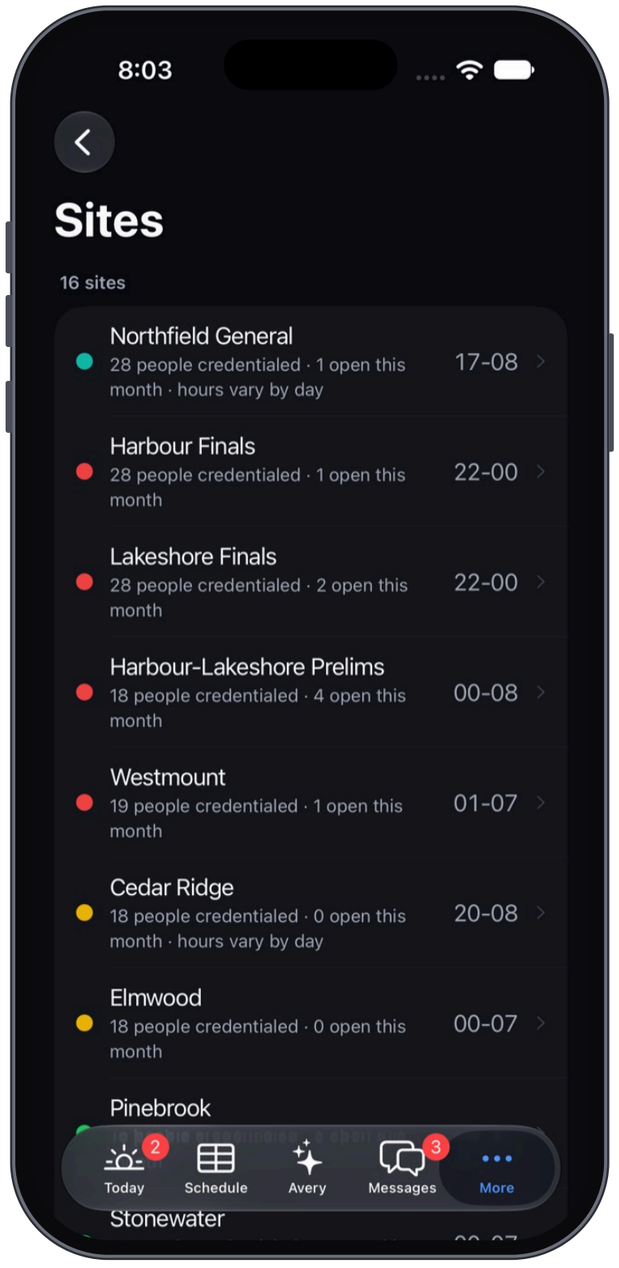

People
On tonight first, then everyone else.

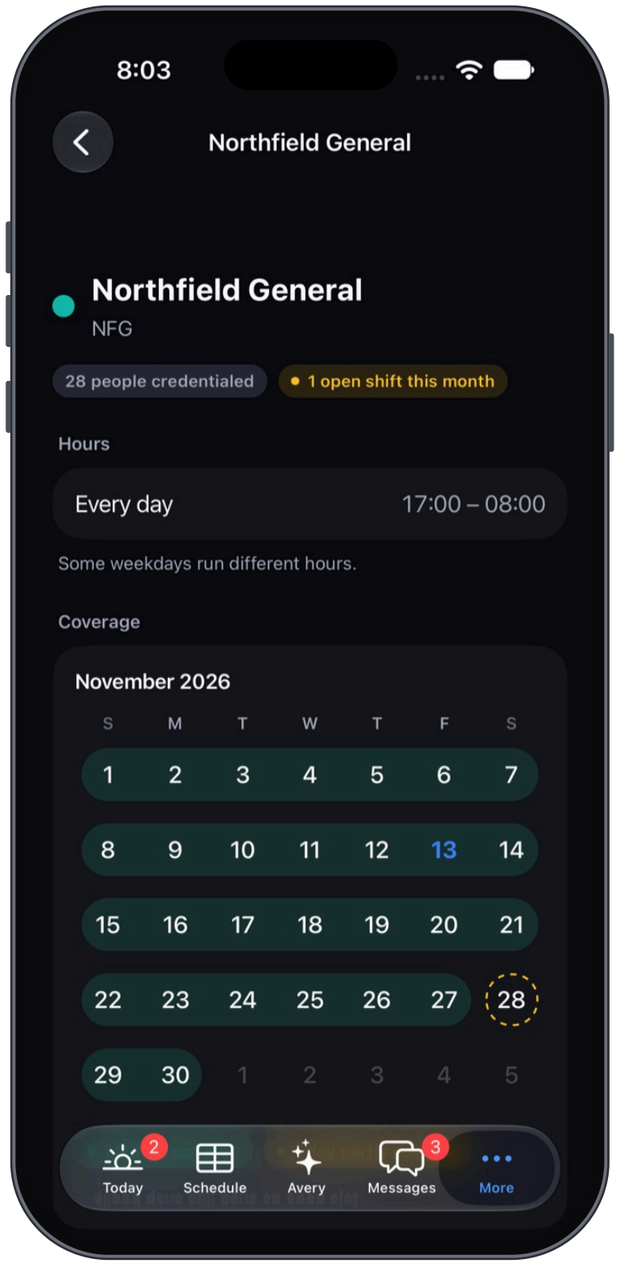

A person
Their month, their sites, and a way to see them on the schedule.

iPhone · Admin

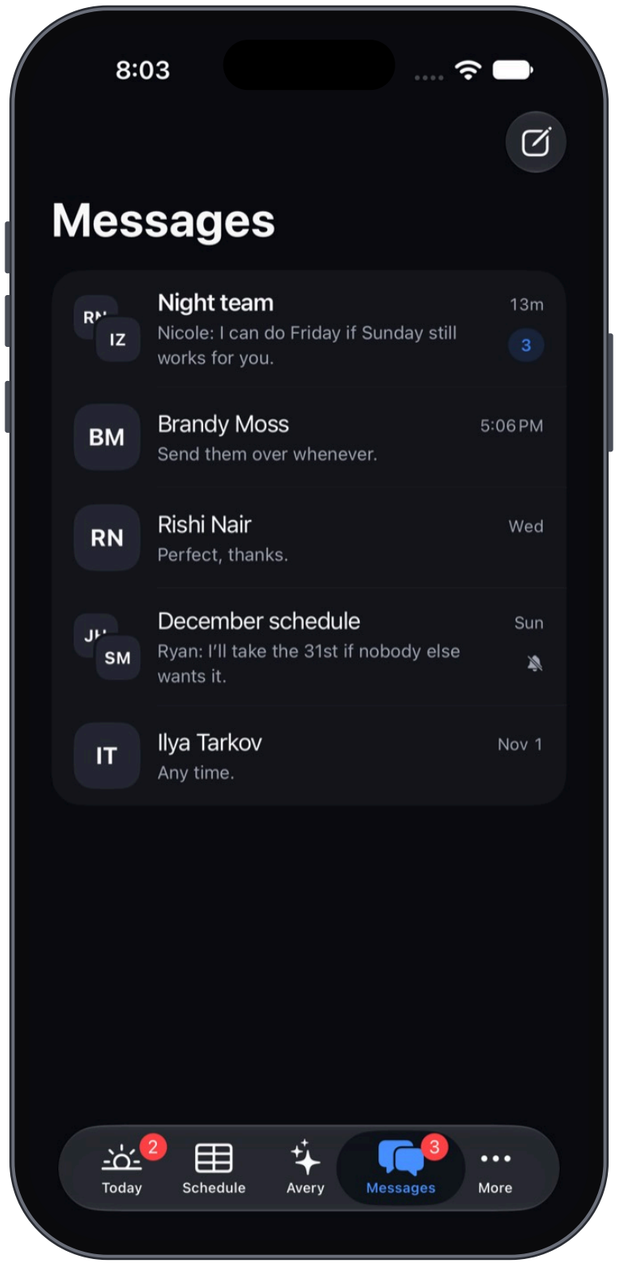

Running the schedule continued, 4 of 6

Sites
Hours, colour and how many people are credentialed.

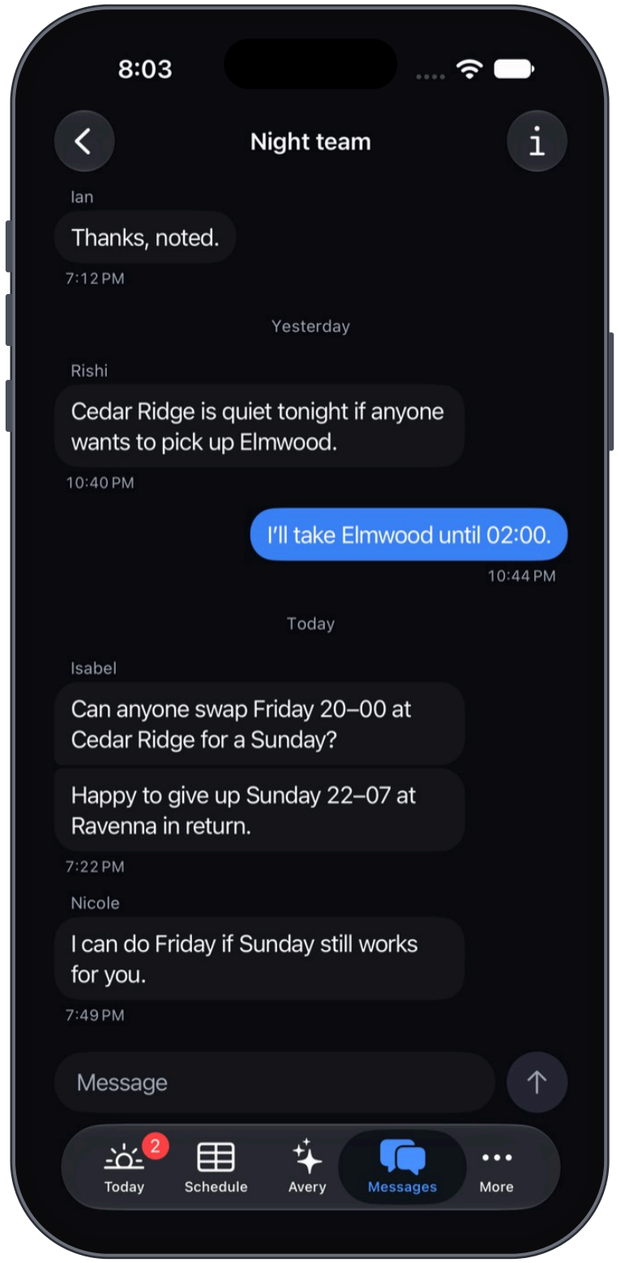

A site
Its hours and the people who cover it.

Messages
Direct and group conversations inside the organisation.

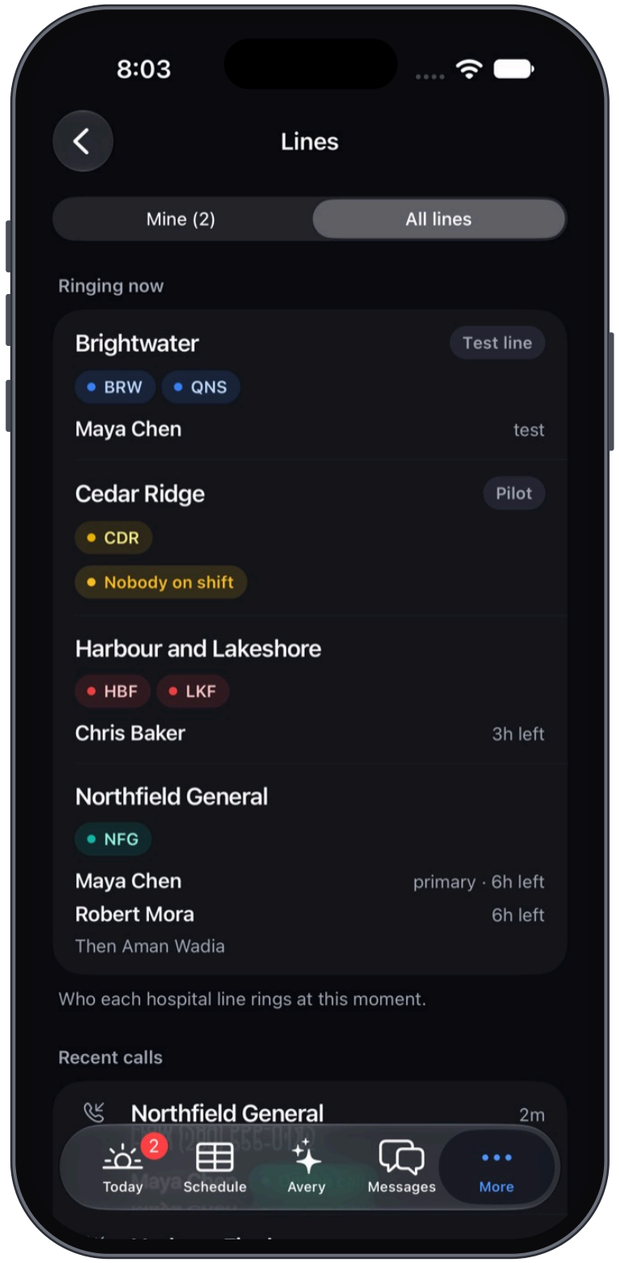

iPhone · Admin

Running the schedule continued, 5 of 6

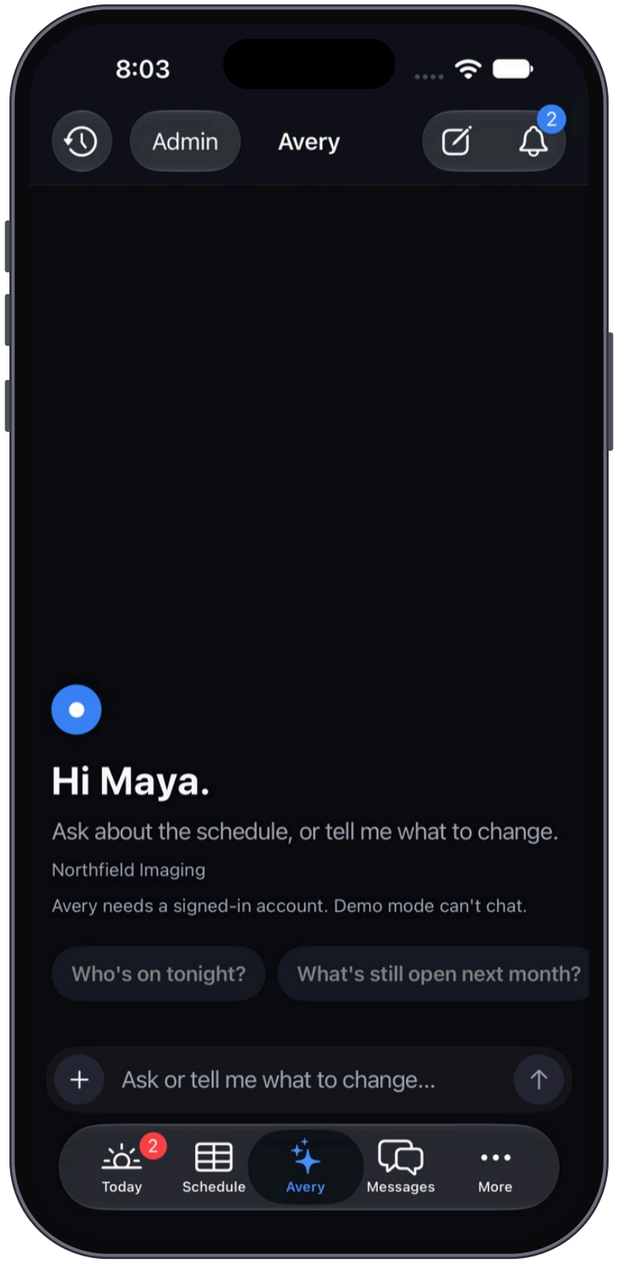

A conversation

Day lines, runs of messages, a composer that stays above the keyboard.

Hospital lines

Texts a hospital sent to a phone line, and where calls ring.

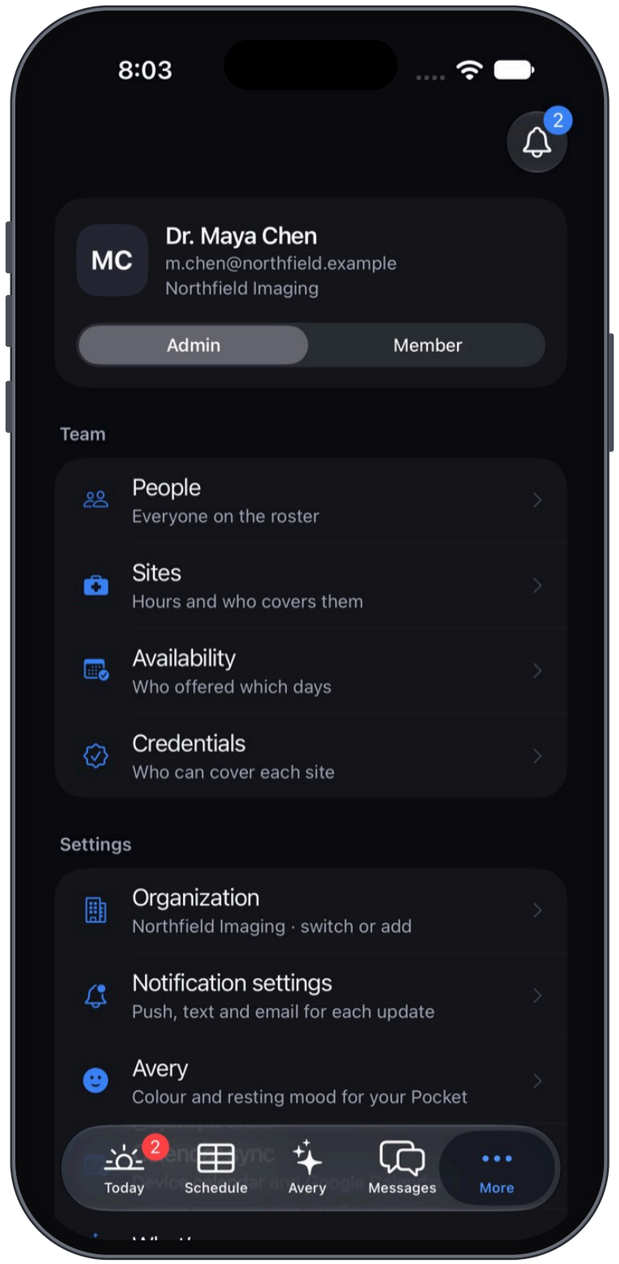

Avery

The assistant: ask about the schedule or say what to change.

iPhone · Admin

Running the schedule continued, 6 of 6

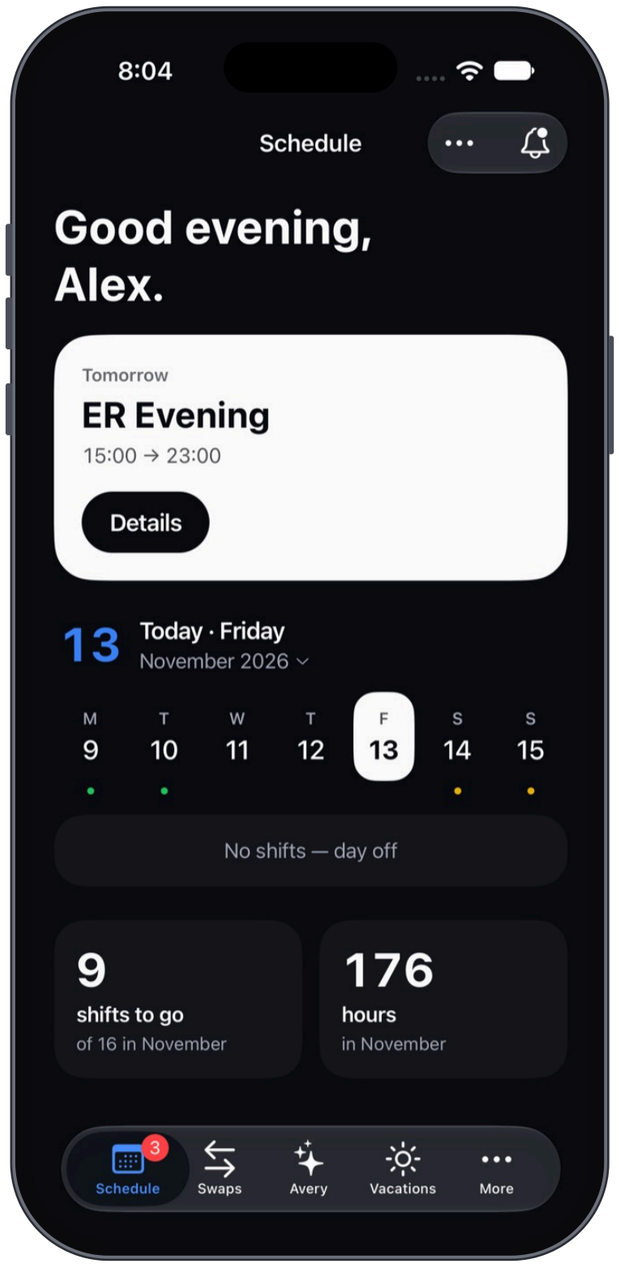

More
Who you are, with the Admin or Member view switch, then the team screens and settings.

iPhone · Member

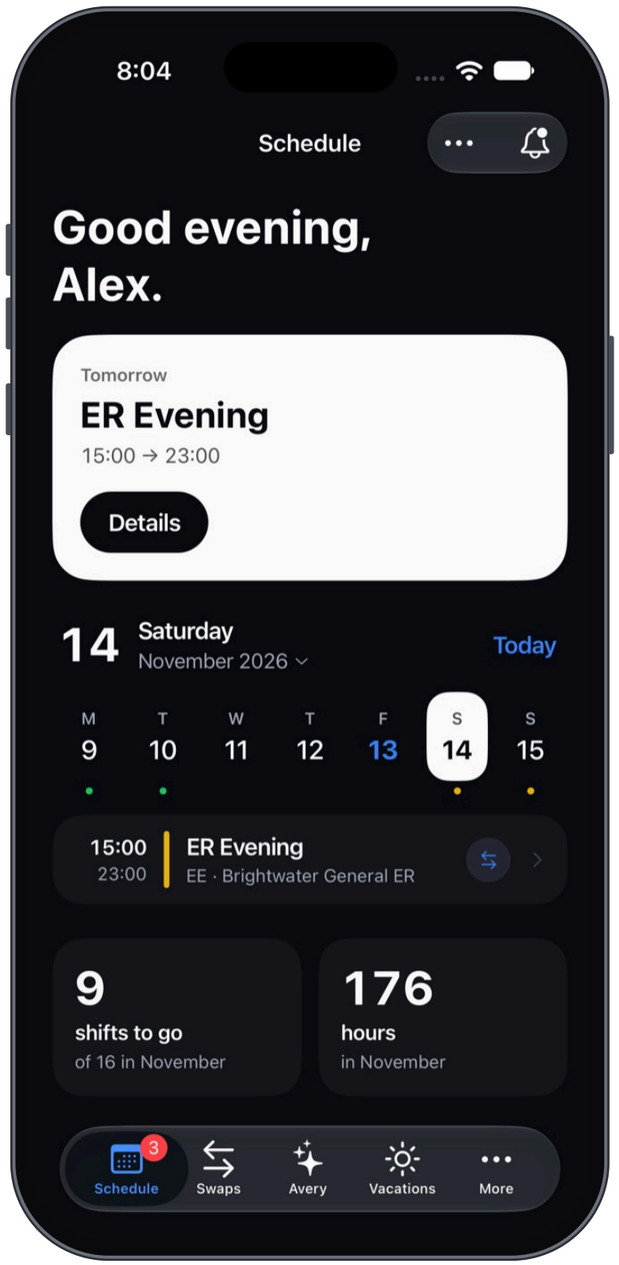

A member's app

What someone on the roster sees. Mostly the second demo organisation; the last figures show the other two.

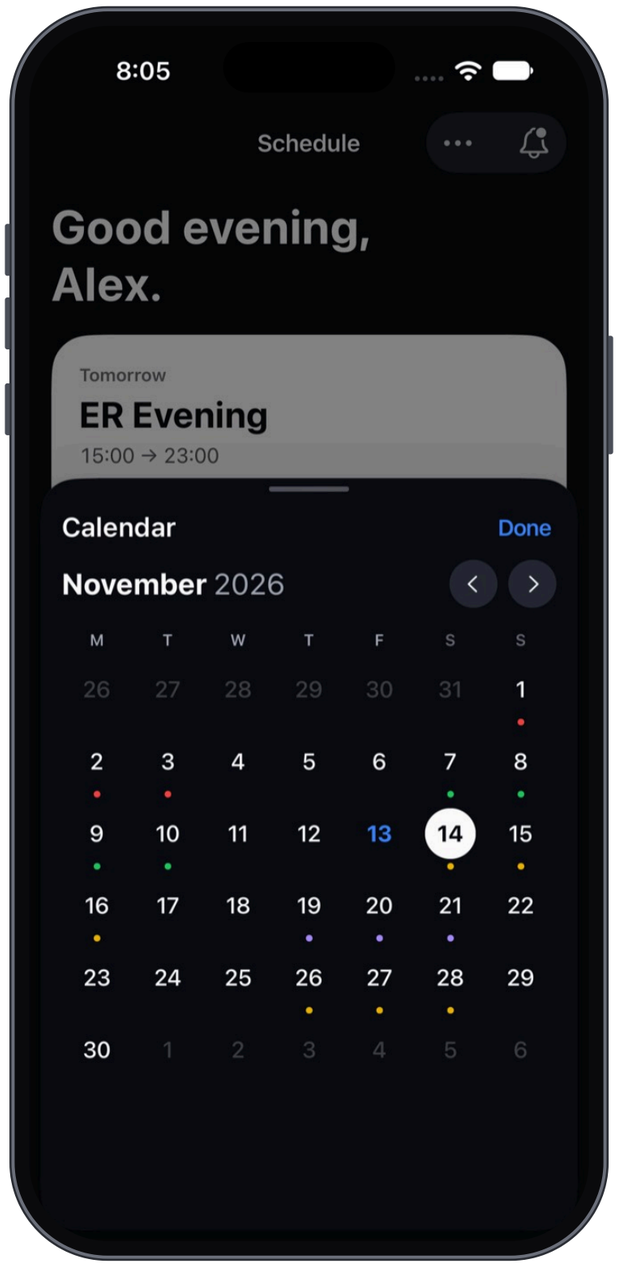

Schedule

A greeting, the next shift on one card, then the day: its week strip and its shifts.

Another day

Tap a day on the strip; Today brings you back.

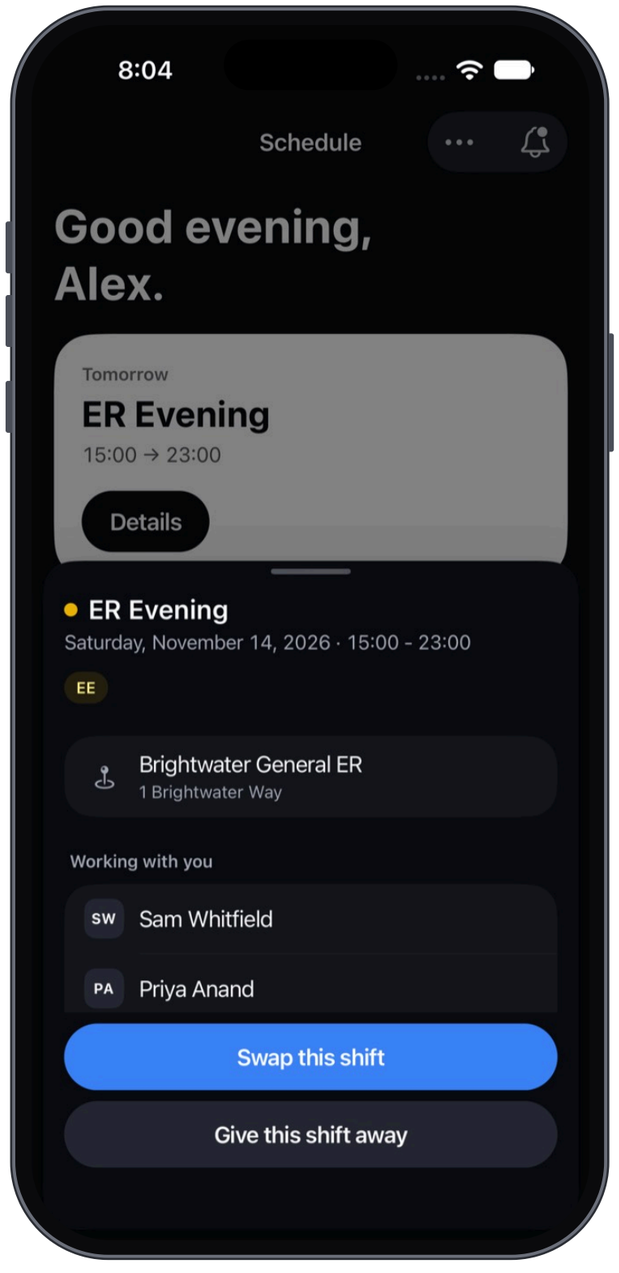

The month

Opens from the day headline; choosing a day closes it.

iPhone · Member

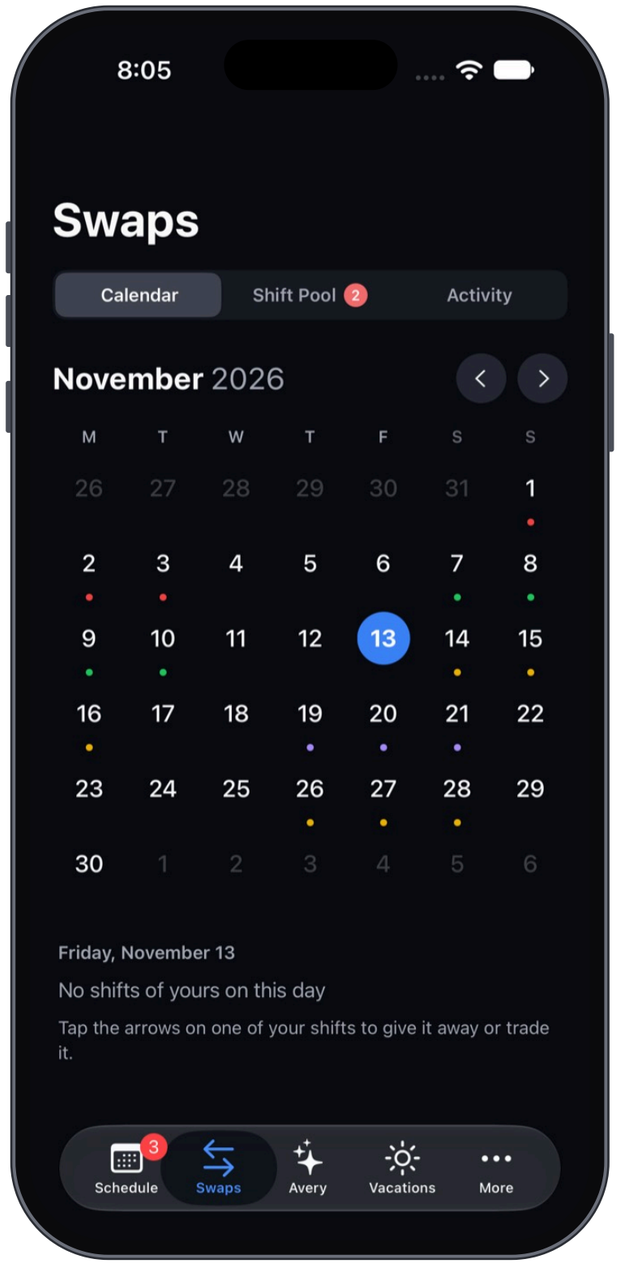

A member's app

continued, 2 of 4

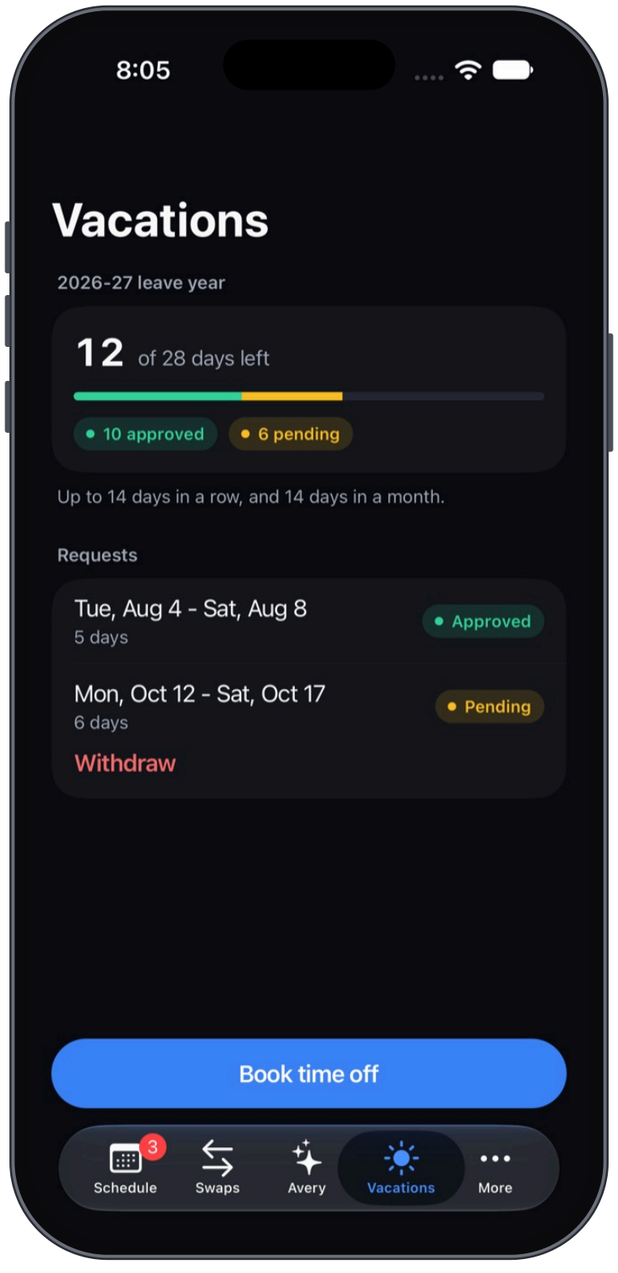

A shift

Where, when, who else is on, and how to swap it or give it away.

Swaps

Your shifts to trade, the shift pool, and what happened.

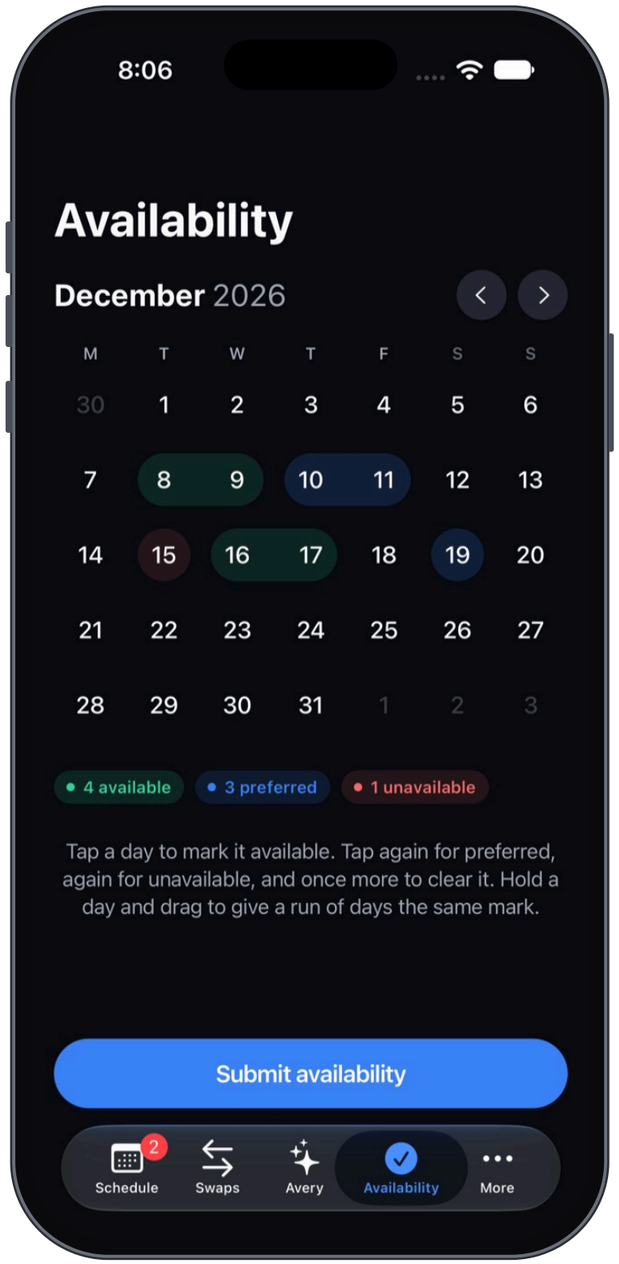

Vacations

Days left, requests, and booking. Each organisation names this tab itself.

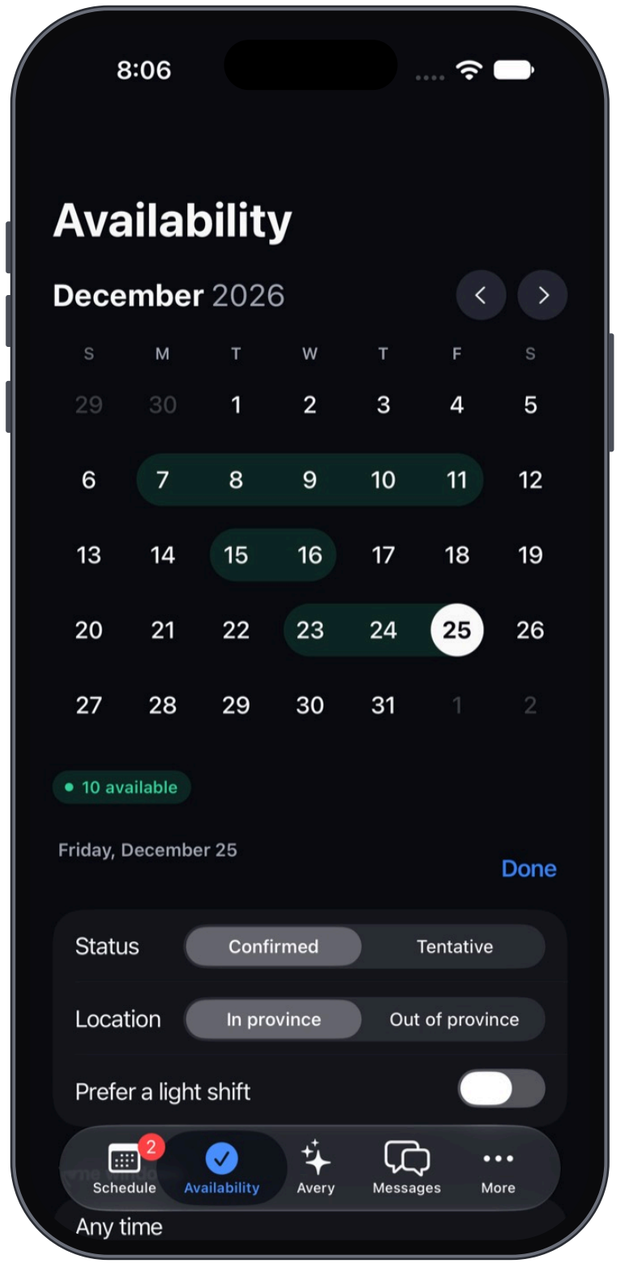

iPhone · Member

A member's app continued, 3 of 4

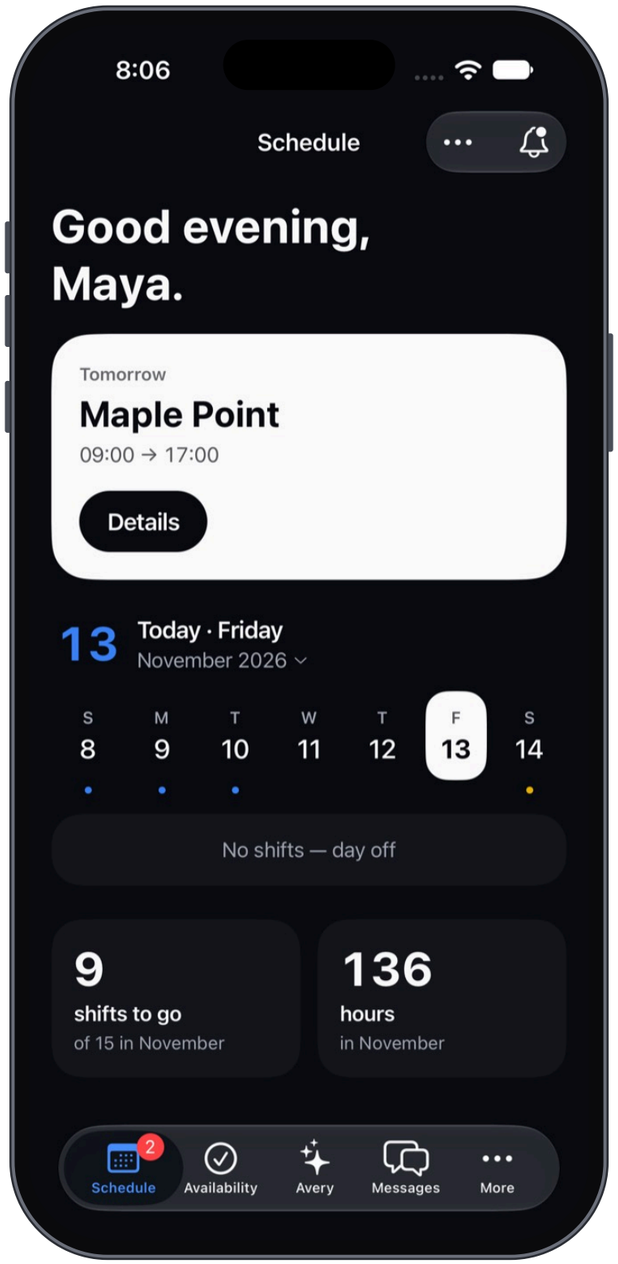

Availability: three states

For departments: tap a day to step through available, preferred and unavailable, or hold and drag to give a run the same mark. Shown with the third demo organisation.

Availability: days and details

For radiology groups: tap the days you can work or hold and drag across several, then set status, province and light shifts.

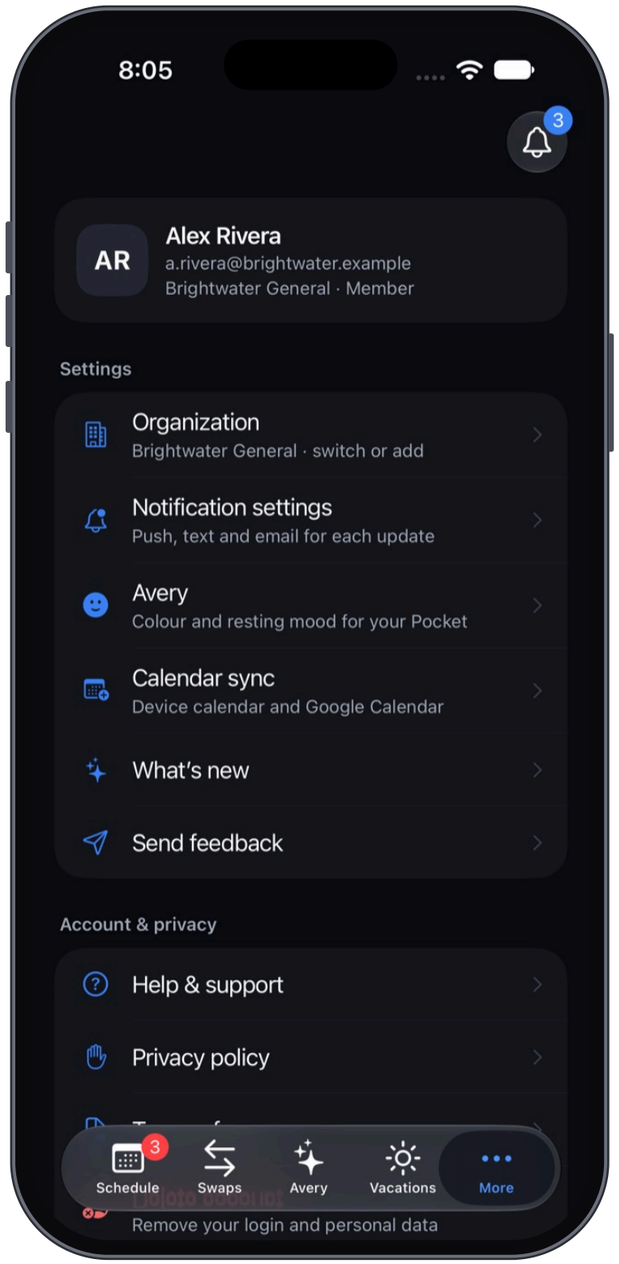

Schedule: a radiology group

The same screen for a member of the first demo organisation.

iPhone · Member

A member's app continued, 4 of 4

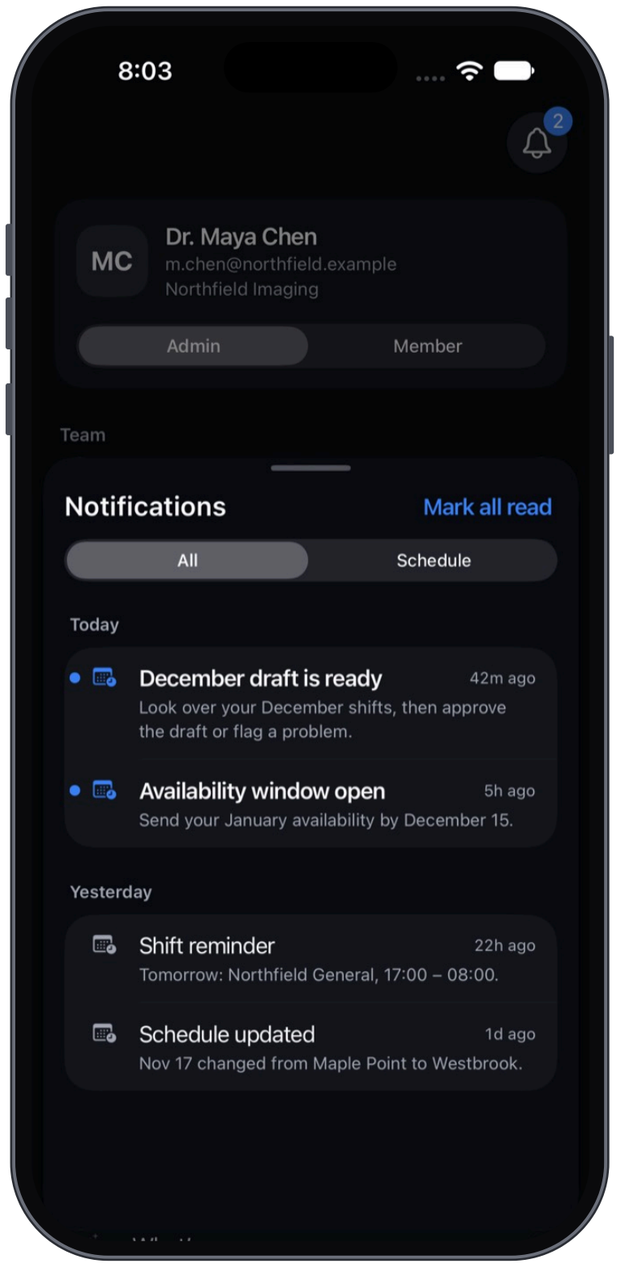

More
A member has no admin sections.

iPhone · Everyone

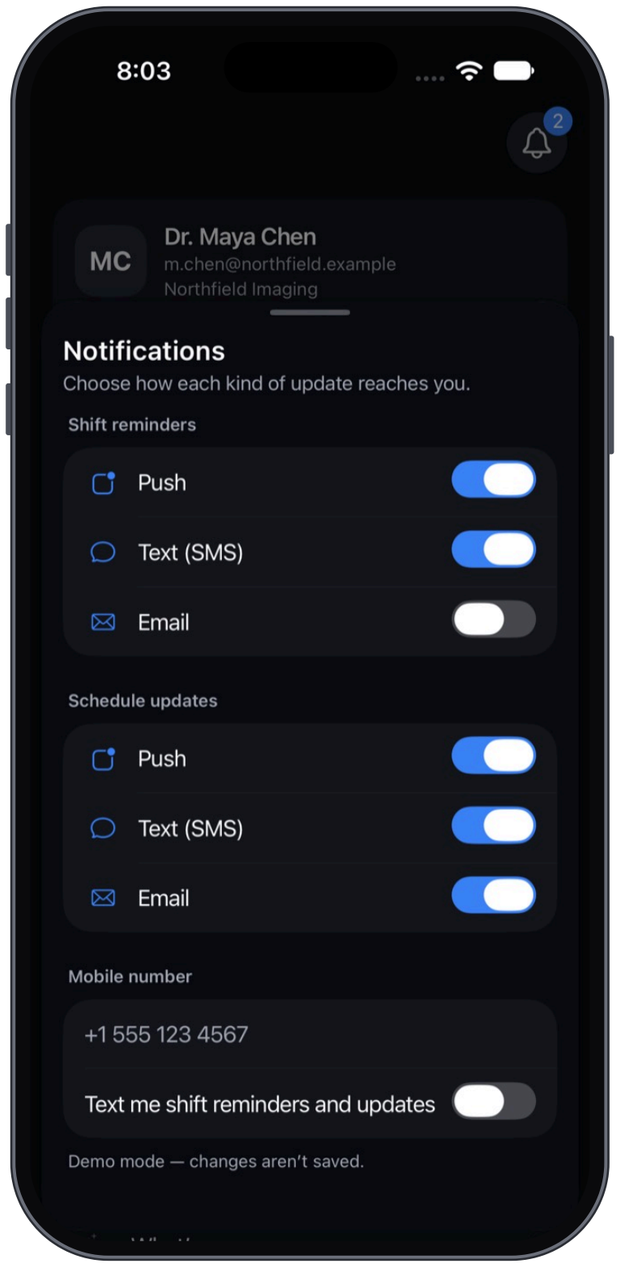

Sheets, system surfaces and sign-in

Things that sit over the app or outside it, the same for an admin and a member.

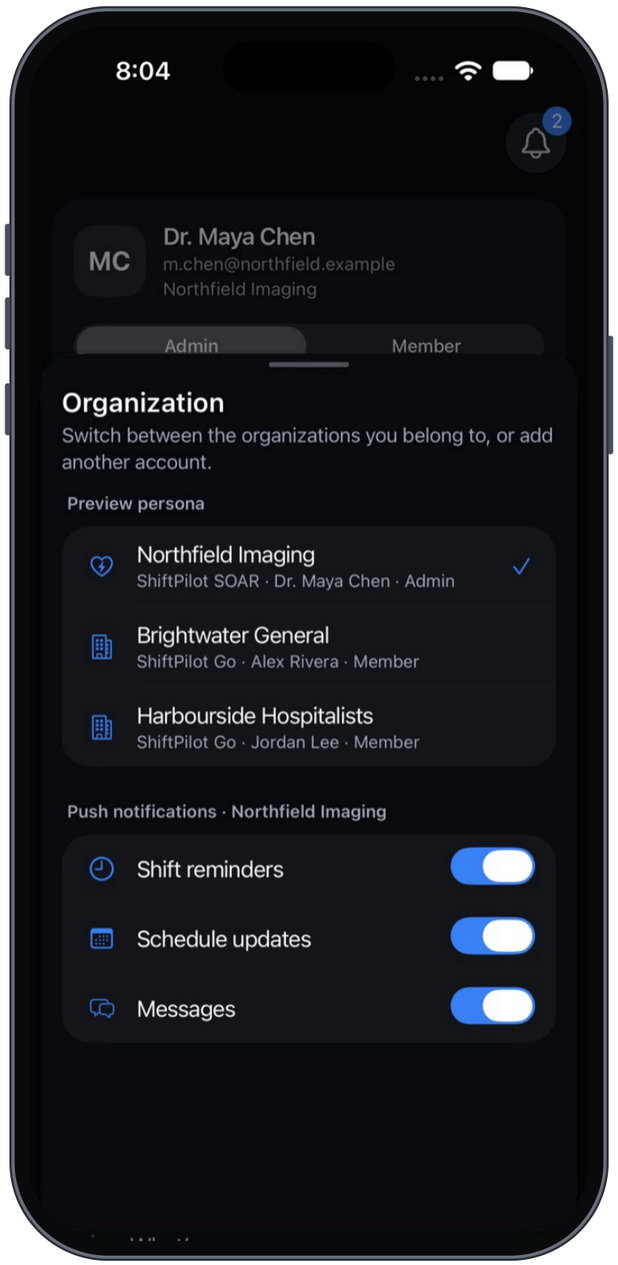

Notifications

The inbox behind the bell, shown for an admin.

Notification settings

Push, text and email for each kind of update.

Organisation

Switch between organisations, or add one.

iPhone · Everyone

Sheets, system surfaces and sign-in continued, 2 of 4

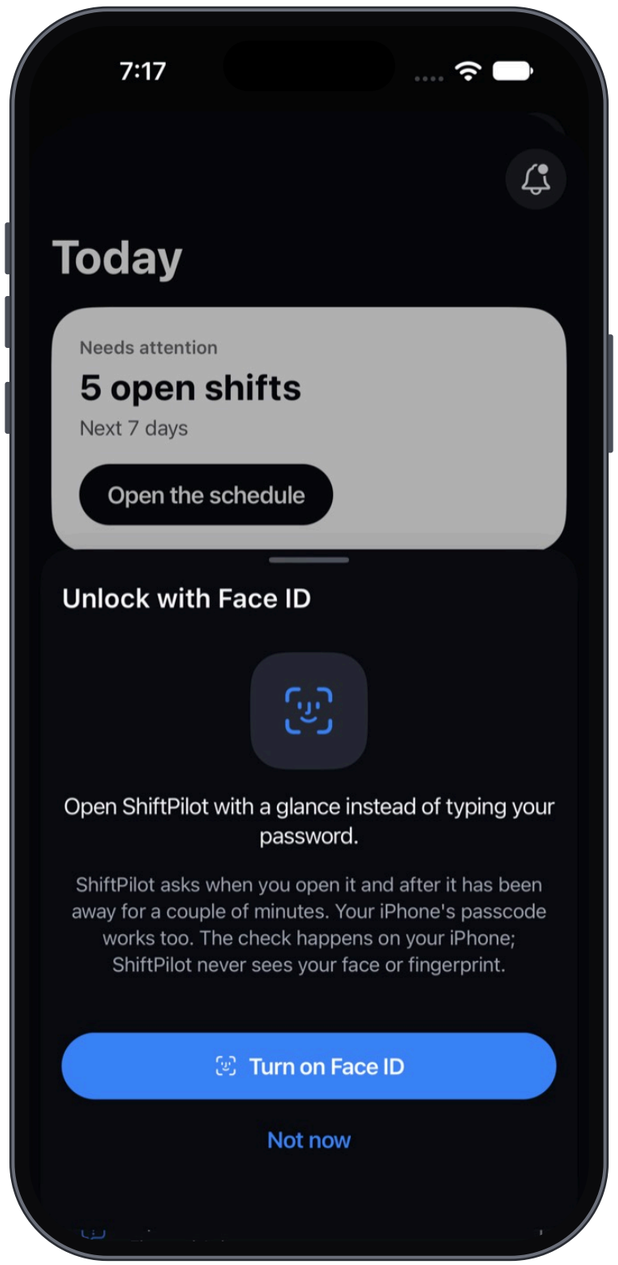

Live Activity

The shift on the Lock Screen: a live countdown and how far through it is.

Sign in

The one place the brand shows itself.

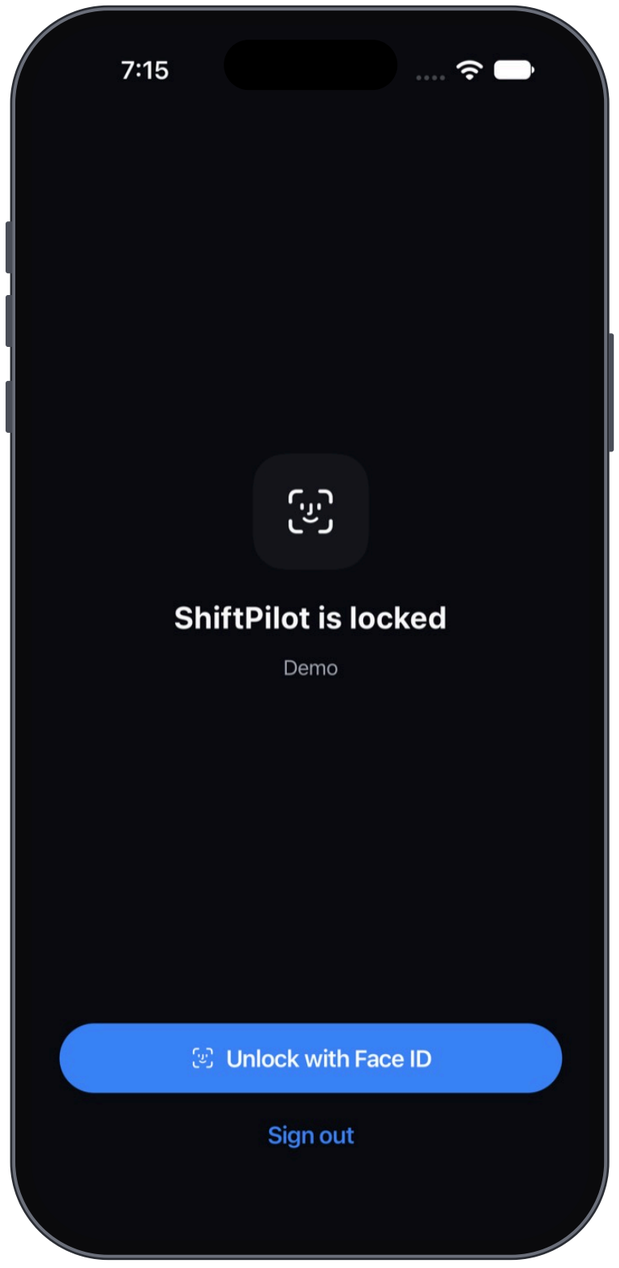

Unlock with Face ID

Offered once after a first sign-in; fingerprint or face unlock on Android. Also under More.

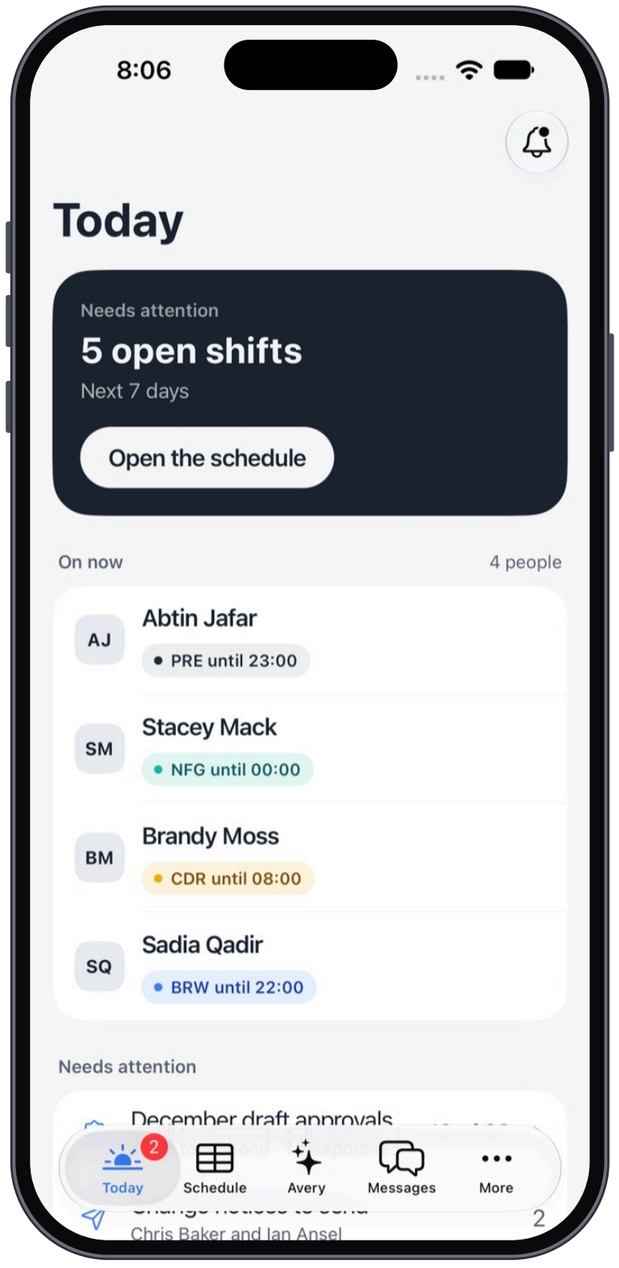

iPhone · Everyone

Sheets, system surfaces and sign-in continued, 3 of 4

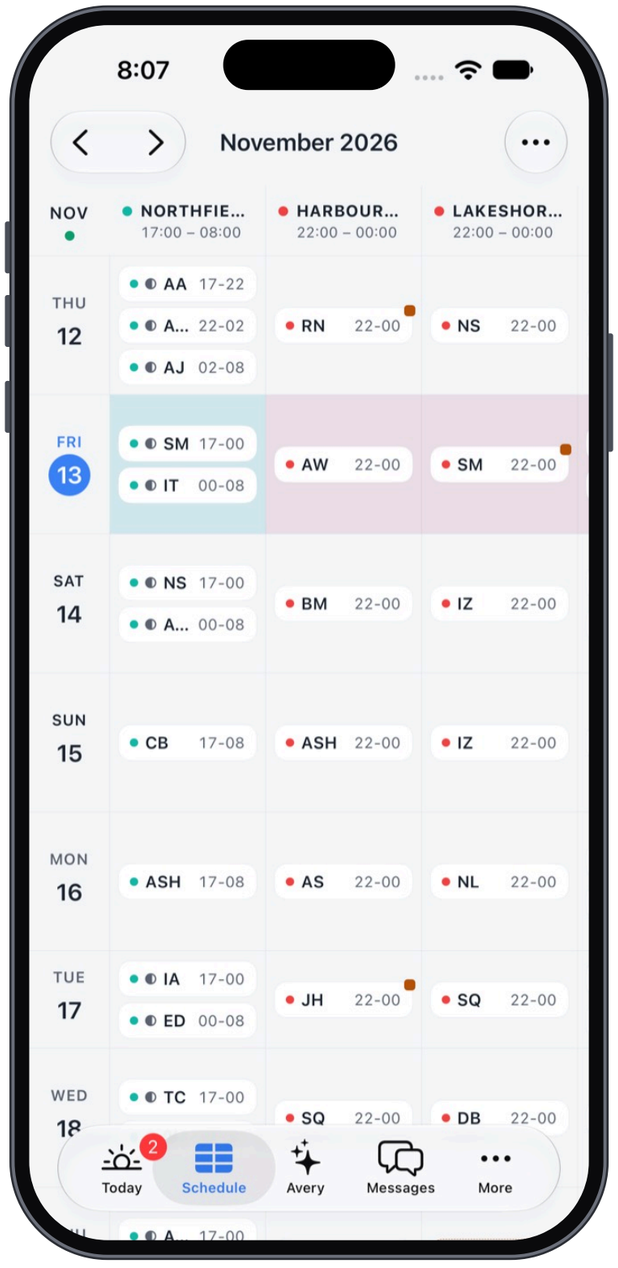

Locked

A remembered sign-in opens with Face ID. The passcode is the fallback, and Sign out is always there.

Light: Today

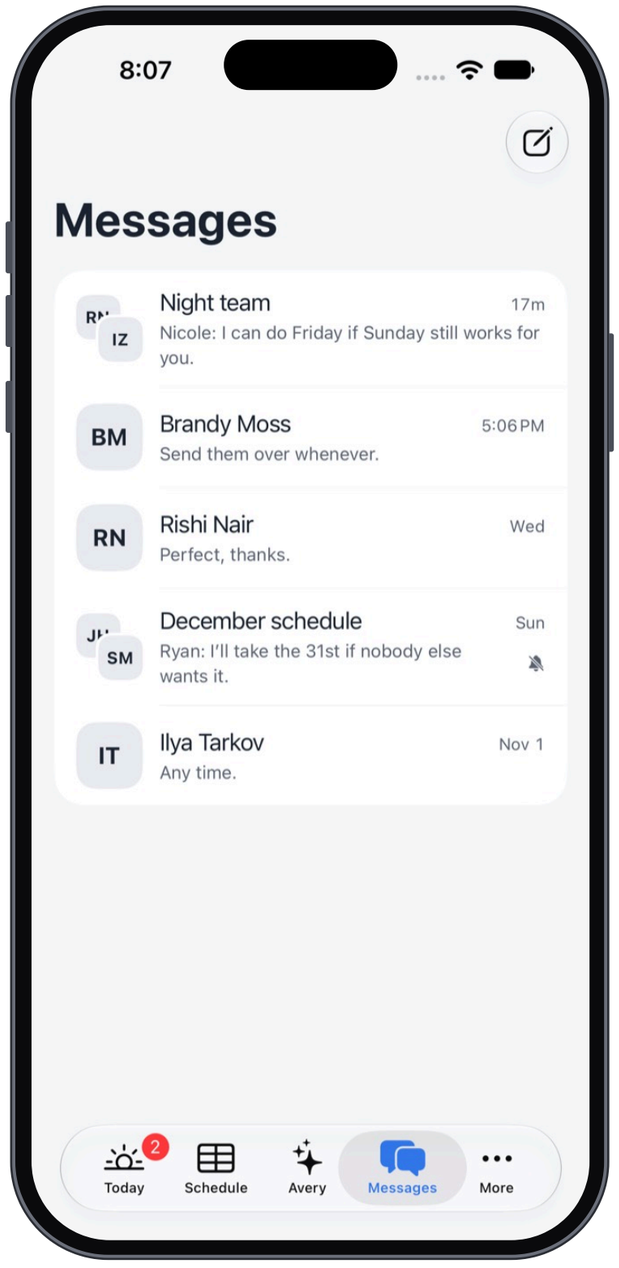

The app follows the system appearance.

Light: schedule

iPhone · Everyone

Sheets, system surfaces and sign-in continued, 4 of 4

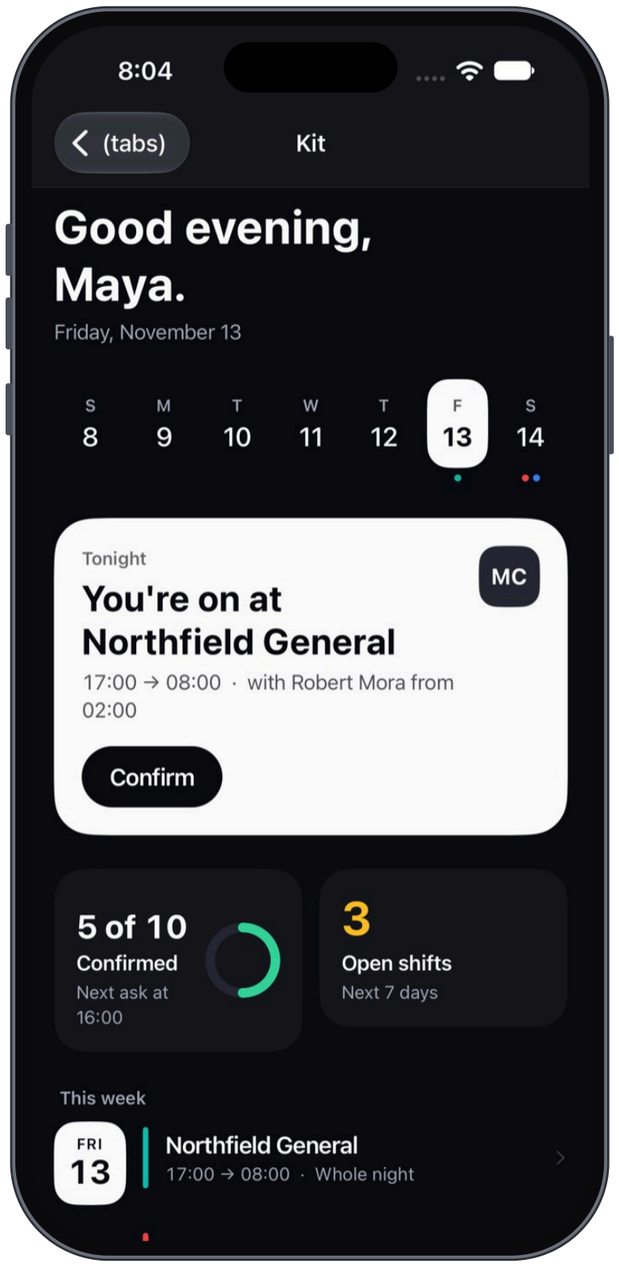

Light: messages

iPhone · Design kit

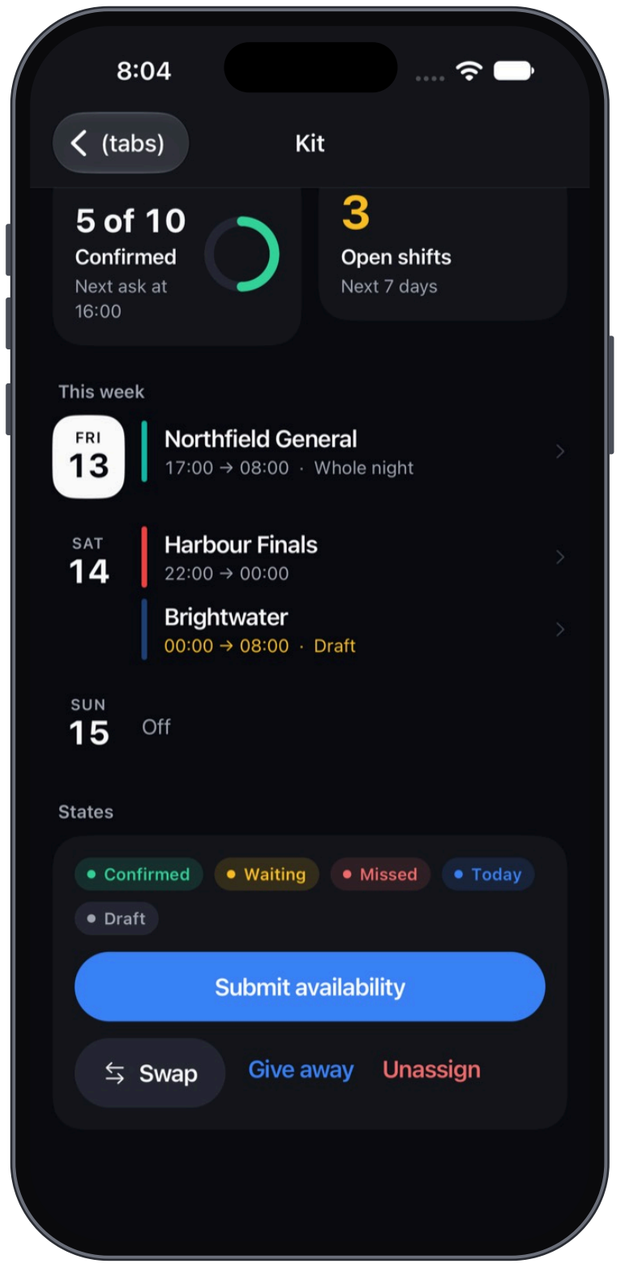

The parts

The component kit every screen is built from. A development screen; nobody using the app sees it.

Kit: headline pieces

Greeting, week strip, hero card, headline numbers and ring.

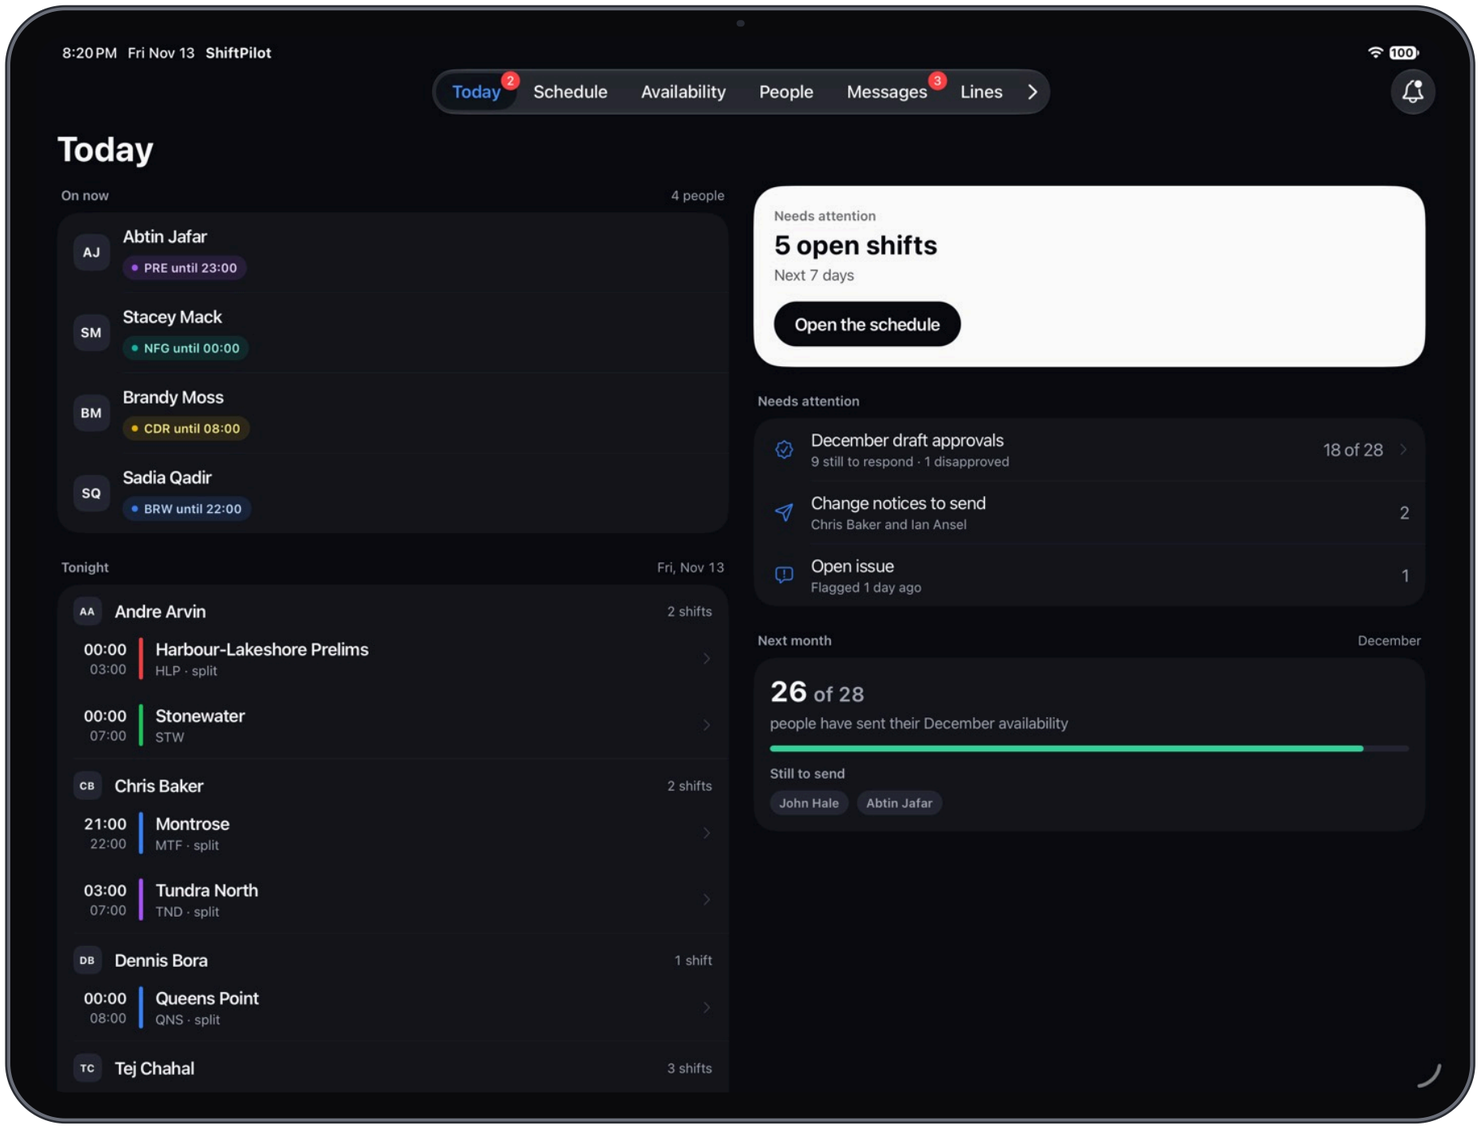

Kit: lists and controls

Agenda, rows, pills, buttons.

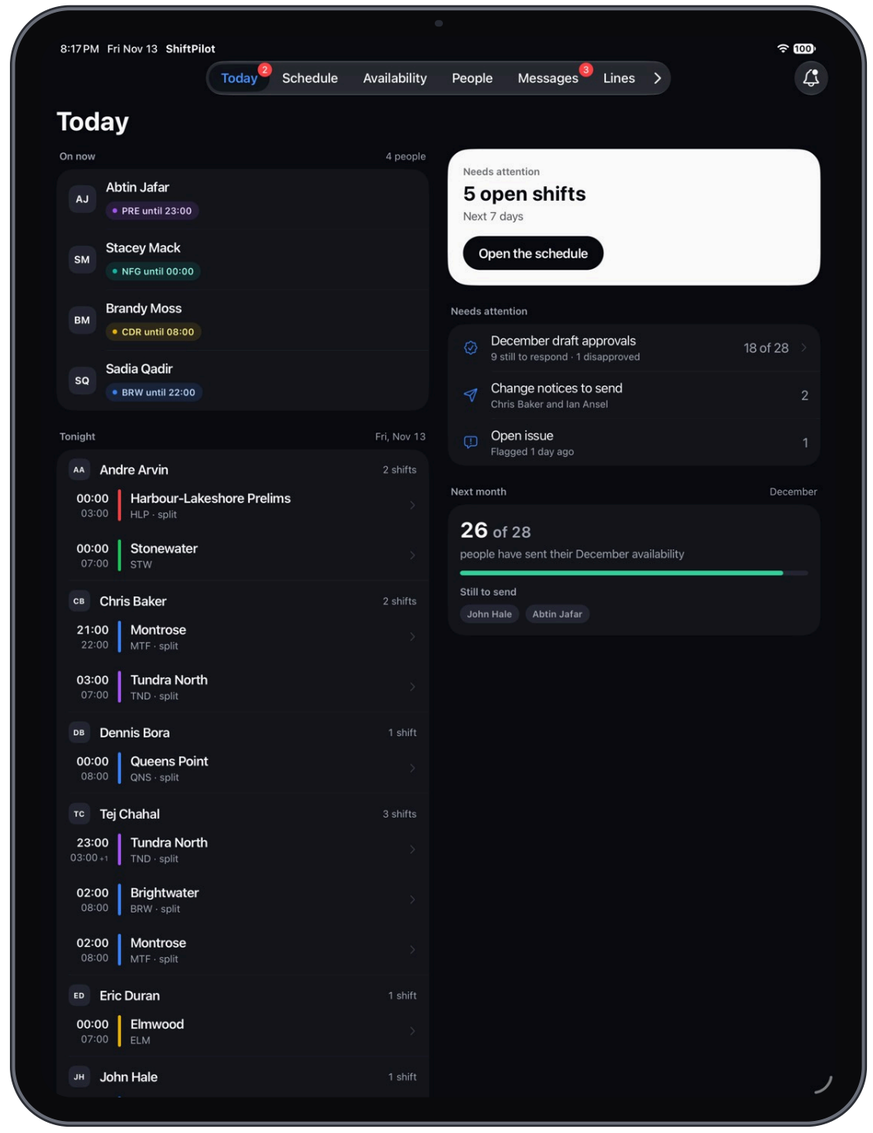

iPad · Admin

Running the schedule on a wide window

The tab bar floats at the top in both orientations. Lists show their open item beside them.

Landscape

Portrait

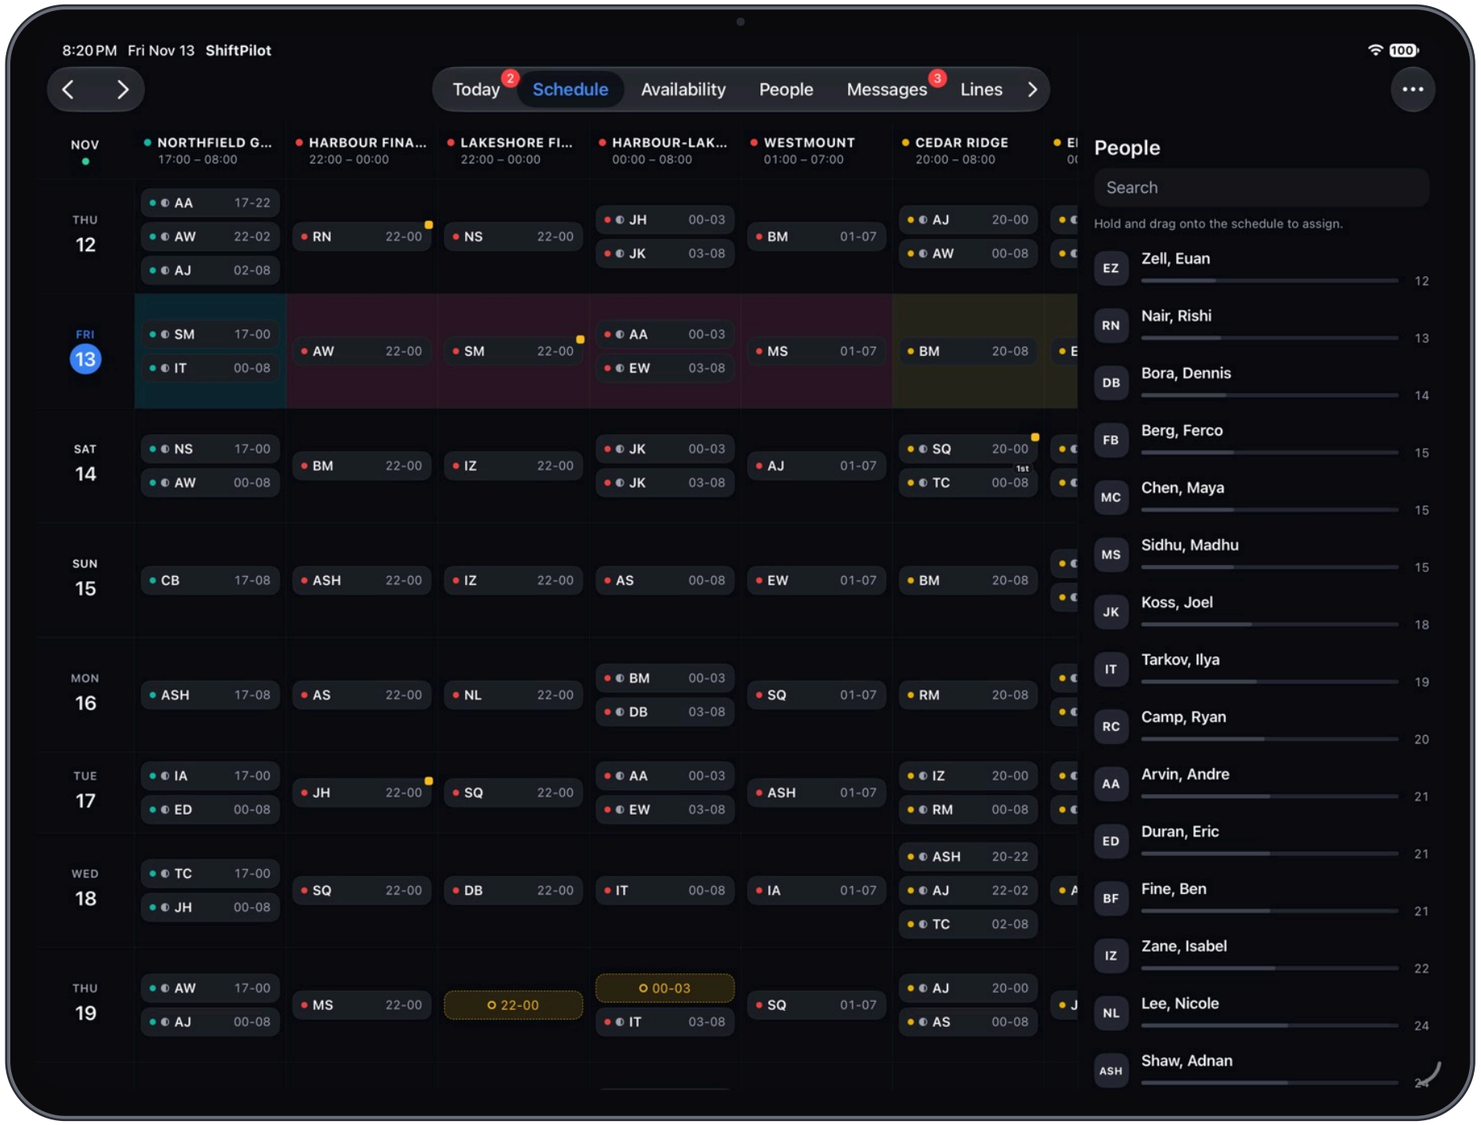

Today

The night on the left, what needs doing on the right.

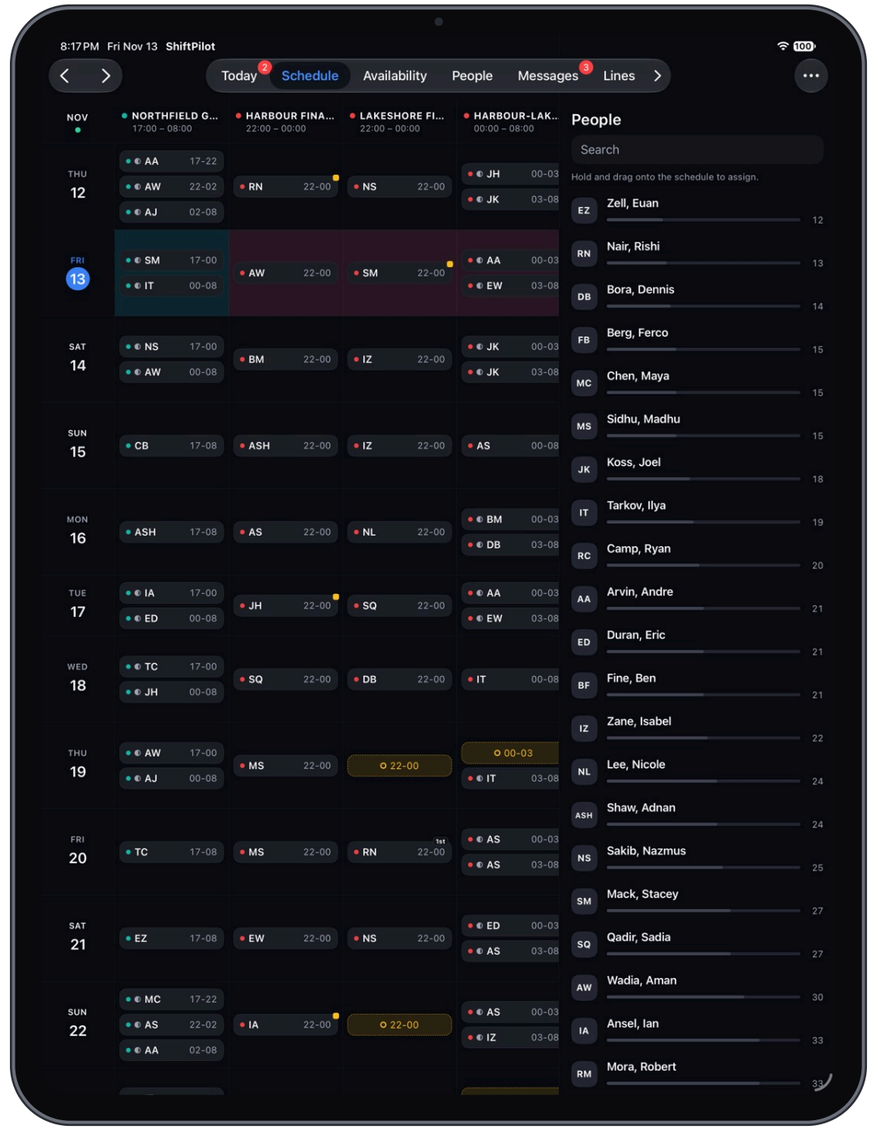

iPad · Admin

Running the schedule on a wide window

Current shift

A notification with a system countdown and progress in the site's colour. The notice under it is the emulator's own.

Apple Watch · Member

The shift on the wrist

A native watch app for anyone with shifts. It shows what the phone last sent it and keeps time by itself.

On shift now
Time left, how far through, and what comes after.

Next shift
When nobody is on: the next one and when it starts.

Coming up
Turn the crown for the list.

Signed out
Until the phone has sent something.
